iSurvix Field

User experience and workflows

Five project user roles. Real application screens. Desktop and mobile.

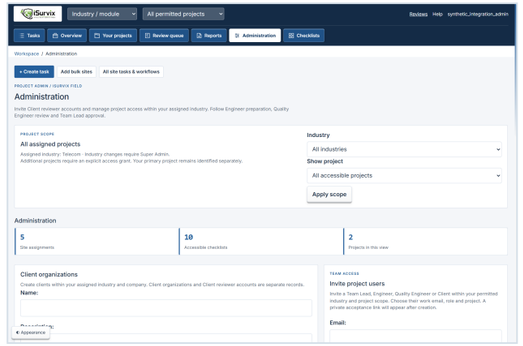

Administration, site assignment, field evidence, AI review, approvals, released outputs and professional profiles - collected in one visual reference.

40 screenshots

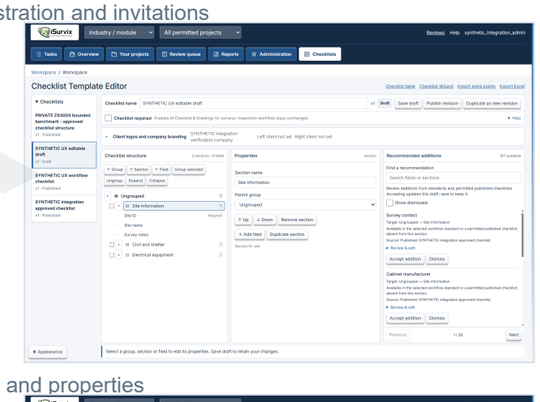

5 user roles | 41 pages

Captured from the existing Django application using an isolated copy of labelled test records. Operational surveys, uploaded originals and approvals were preserved.

GUIDE NAVIGATION

Find a role or workflow

Each screenshot is identified by role and screen. Use the PDF bookmarks or click a row below.

Project Admin	Company projects, team invitations, task creation and checklist setup.	5-16
Engineer	Assigned tasks, checklist answers, evidence, AI proposals and experience.	17-24
QA Engineer	Submitted work, evidence review, return reasons and technical history.	25-29
Team Lead	Site assignment, QA hand-off, clarification and authorised outputs.	30-34
Client	Assigned decisions, released files and eligible professional profiles.	35-39

Workflow maps Pages 3-4

Mobile comparison Pages 40-41

WORKFLOW 01

From project setup to a closed activity

The project chooses three or four review layers. Each task retains its assigned review route.

Project Admin

THREE-LAYER REVIEW

Engineer

Complete and submit

→

QA Engineer

Review evidence

→

Team Lead

Approve and close

→

Closed

No Client step

Rejection moves one step back: QA to Engineer; Team Lead to QA; Client to Team Lead. A reason is recorded. Clarifications preserve the prior decisions and evidence.

WORKFLOW 02

AI supports the review; people control the decisions

The integrated AI Checklist & Drawings area applies to approved survey templates with Checklist required enabled.

1. Prepare

Save survey inputs and finish uploads.

2. AI Analysis

Analyse photos and supported documents.

3. Proposals

Show checklist answers, sources and uncertainty.

4. Engineer

Correct and explicitly accept reliable findings.

5. Draft outputs

Review PDF/DXF and missing dimensions.

6. Required review

QA checks the package and the project route closes.

7. Authorised release

Team Lead releases permitted outputs to the Client.

AI suggestions do not approve a checklist. Missing evidence and unsupported dimensions remain visible. Draft drawings are for review until release.

PROFESSIONAL PROFILES

Engineer / QA

Add profile, experience and qualifications.

Publish profile

Choose visibility to eligible shared-project users.

Client view

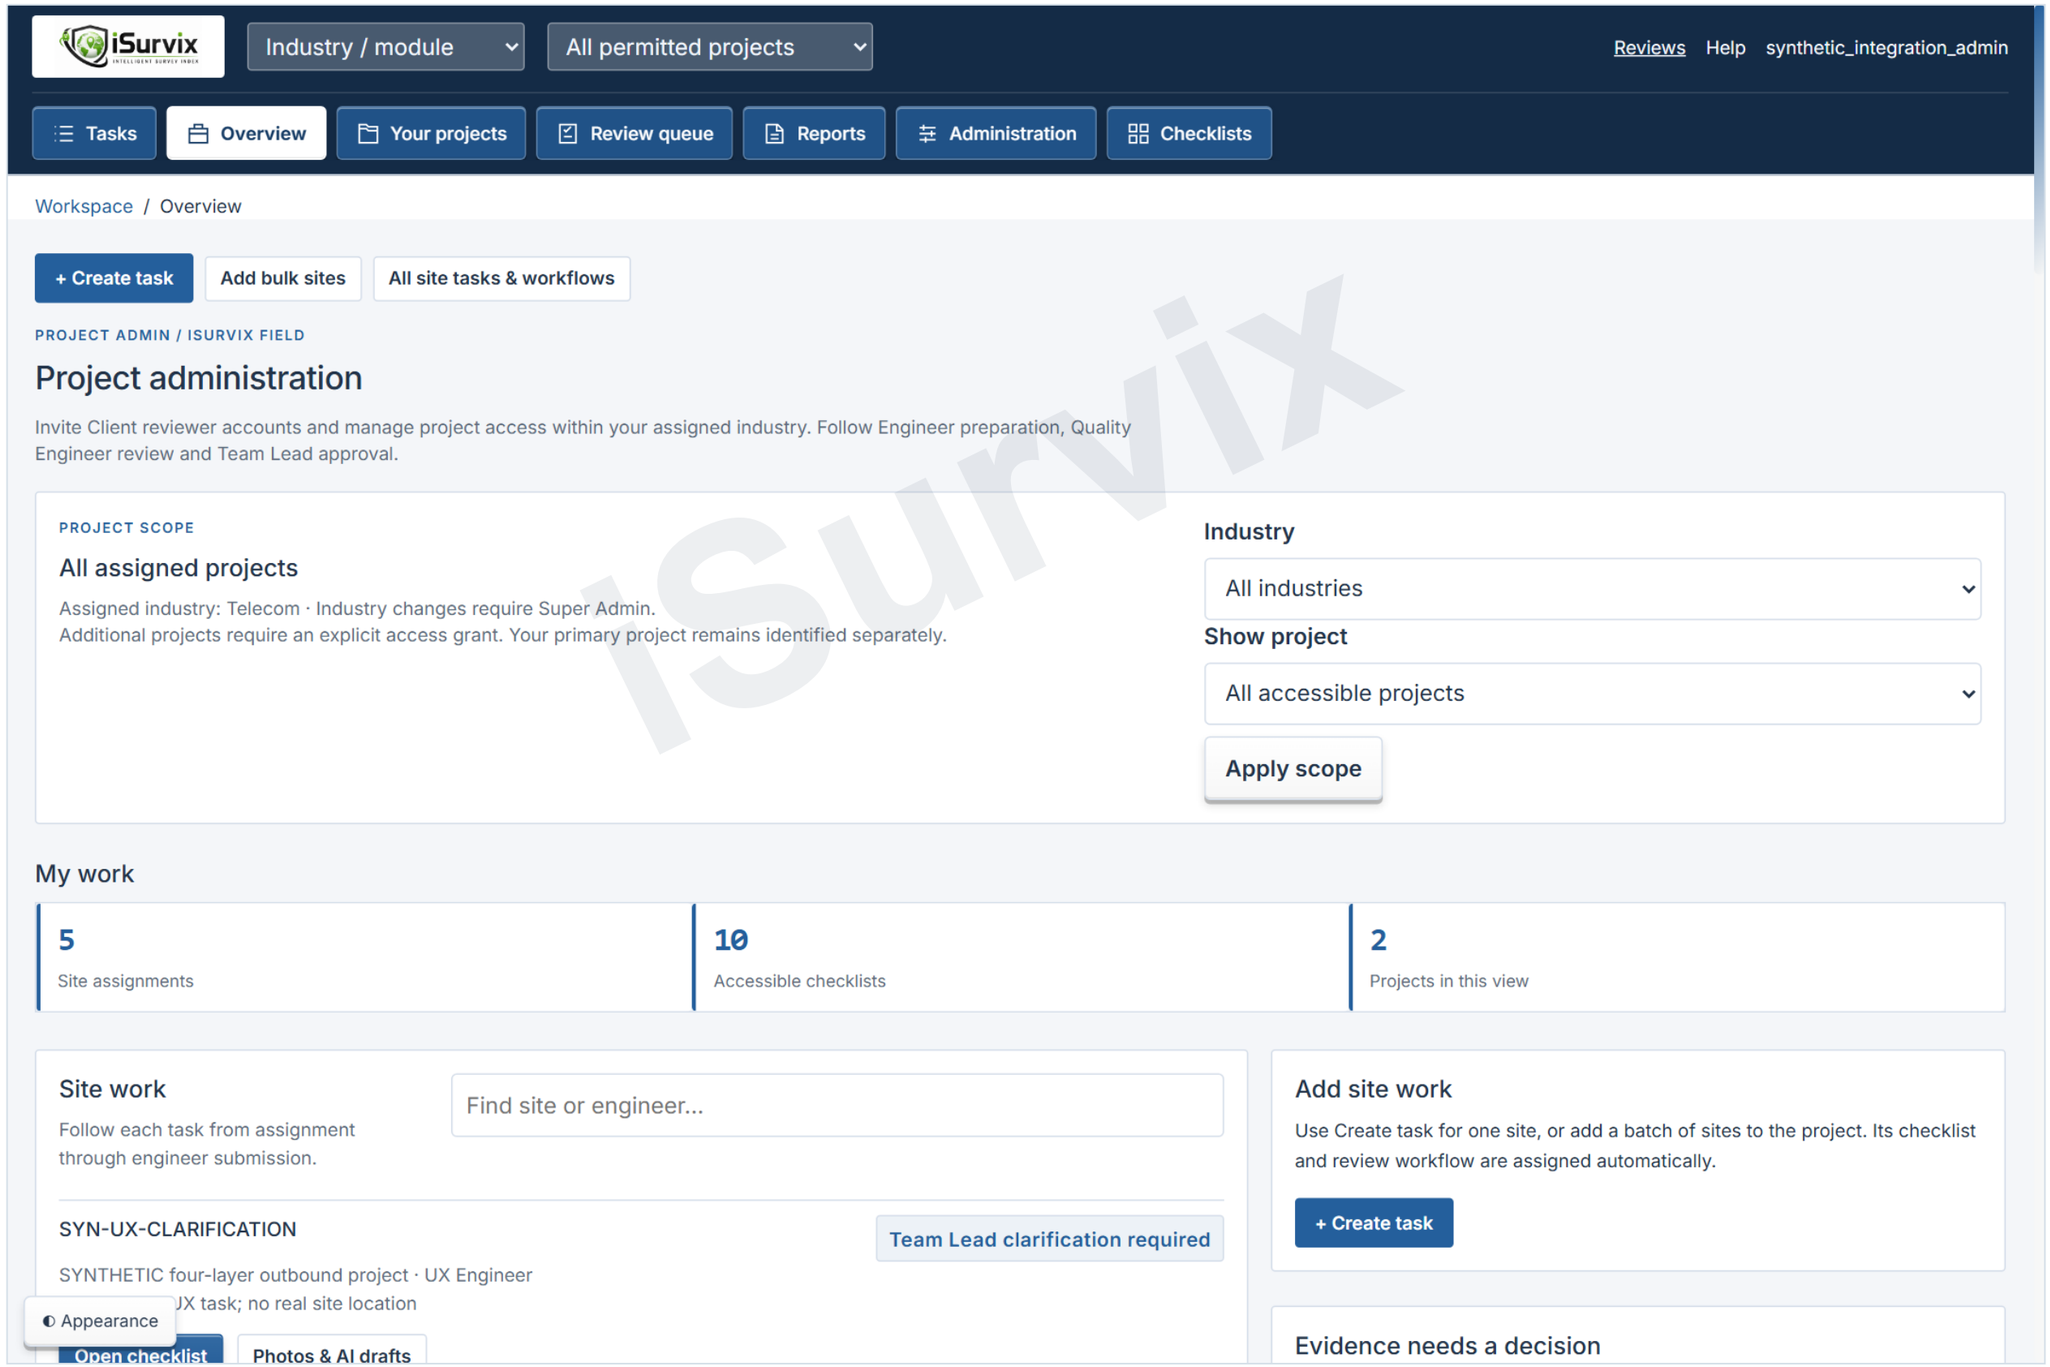

Open the published colleague profile.

Experience and qualifications are self-reported. The guide uses fictional profiles and labelled demonstration evidence.

PROJECT ADMIN

Project Admin workspace

Manage company projects and teams within the assigned industry.

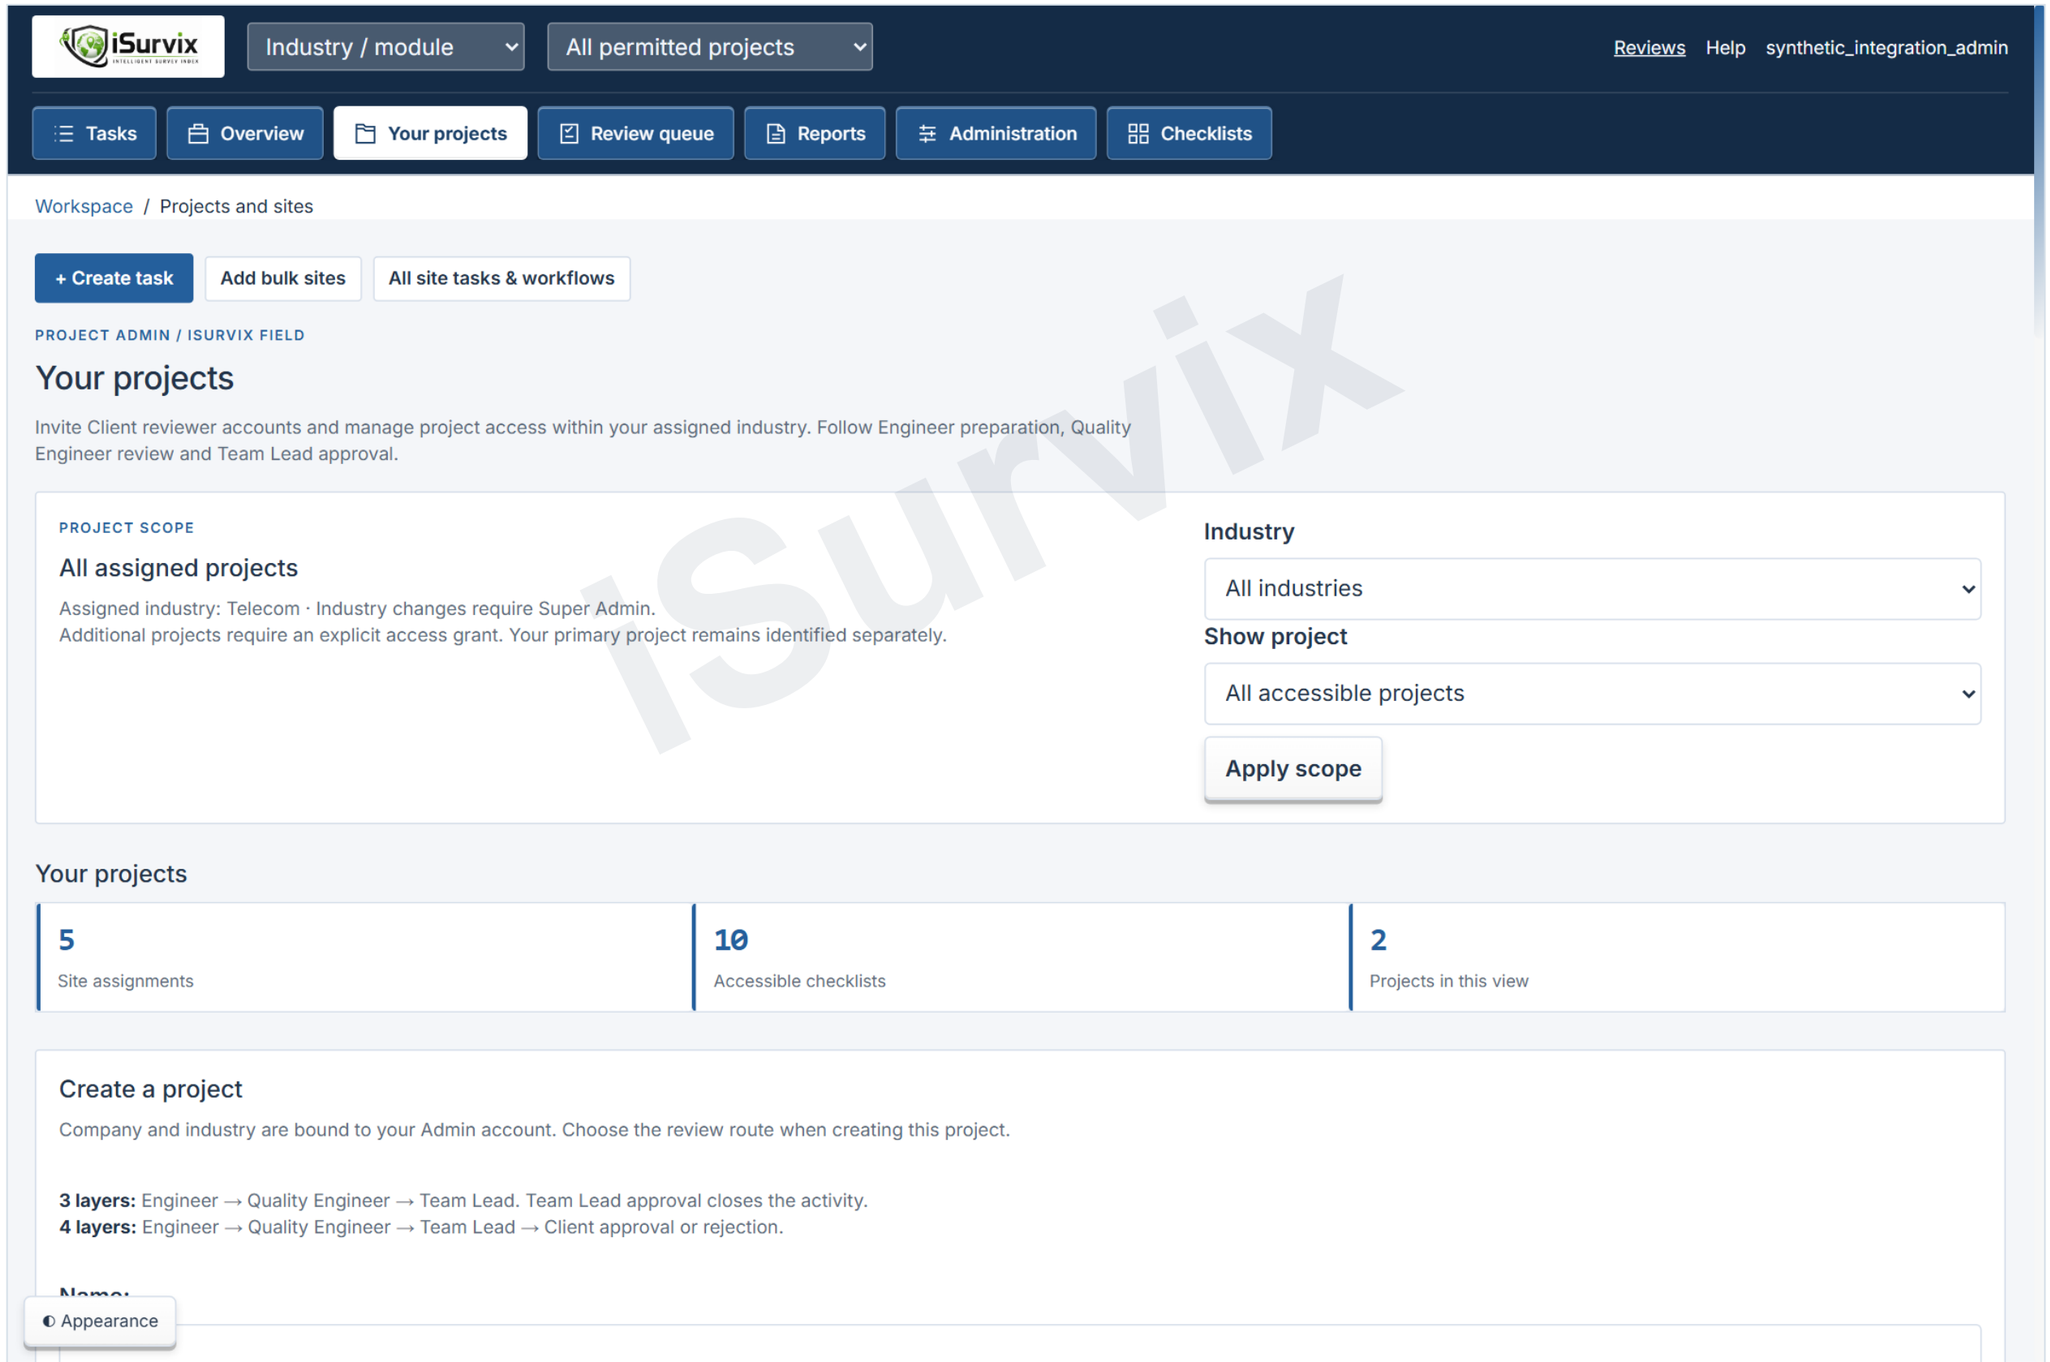

DESKTOP | 1440 x 960 viewport | Current application capture

PROJECT ADMIN

Projects and workflow setup

Choose the project checklist and three- or four-layer review route.

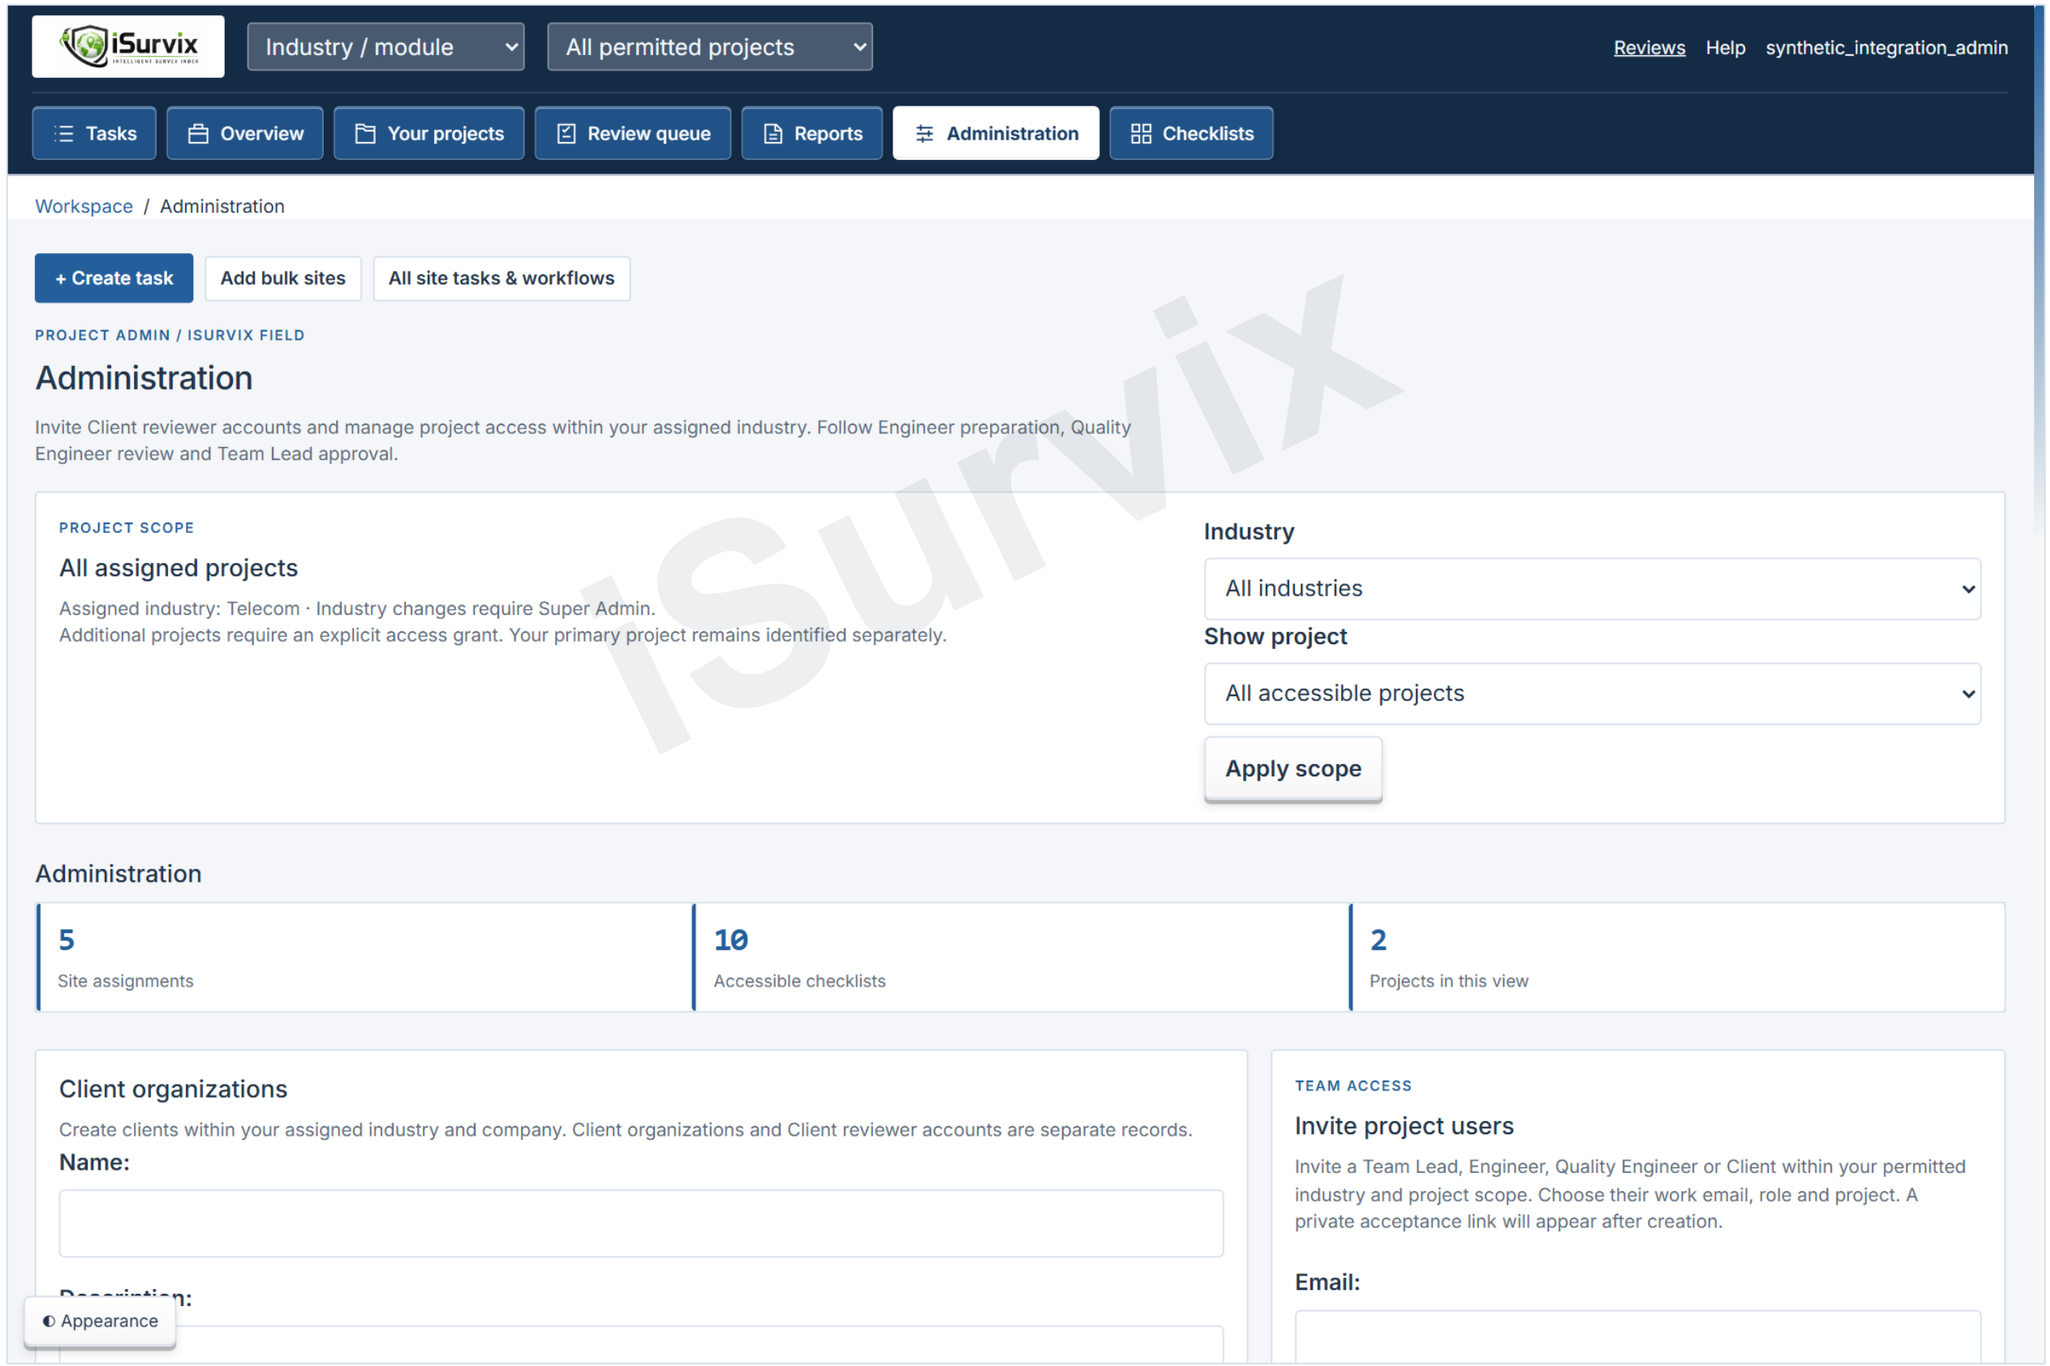

DESKTOP | 1440 x 960 viewport | Current application capture

PROJECT ADMIN

Team administration and invitations

Invite Engineers, QA Engineers, Team Leads and Clients; grant scoped project membership.

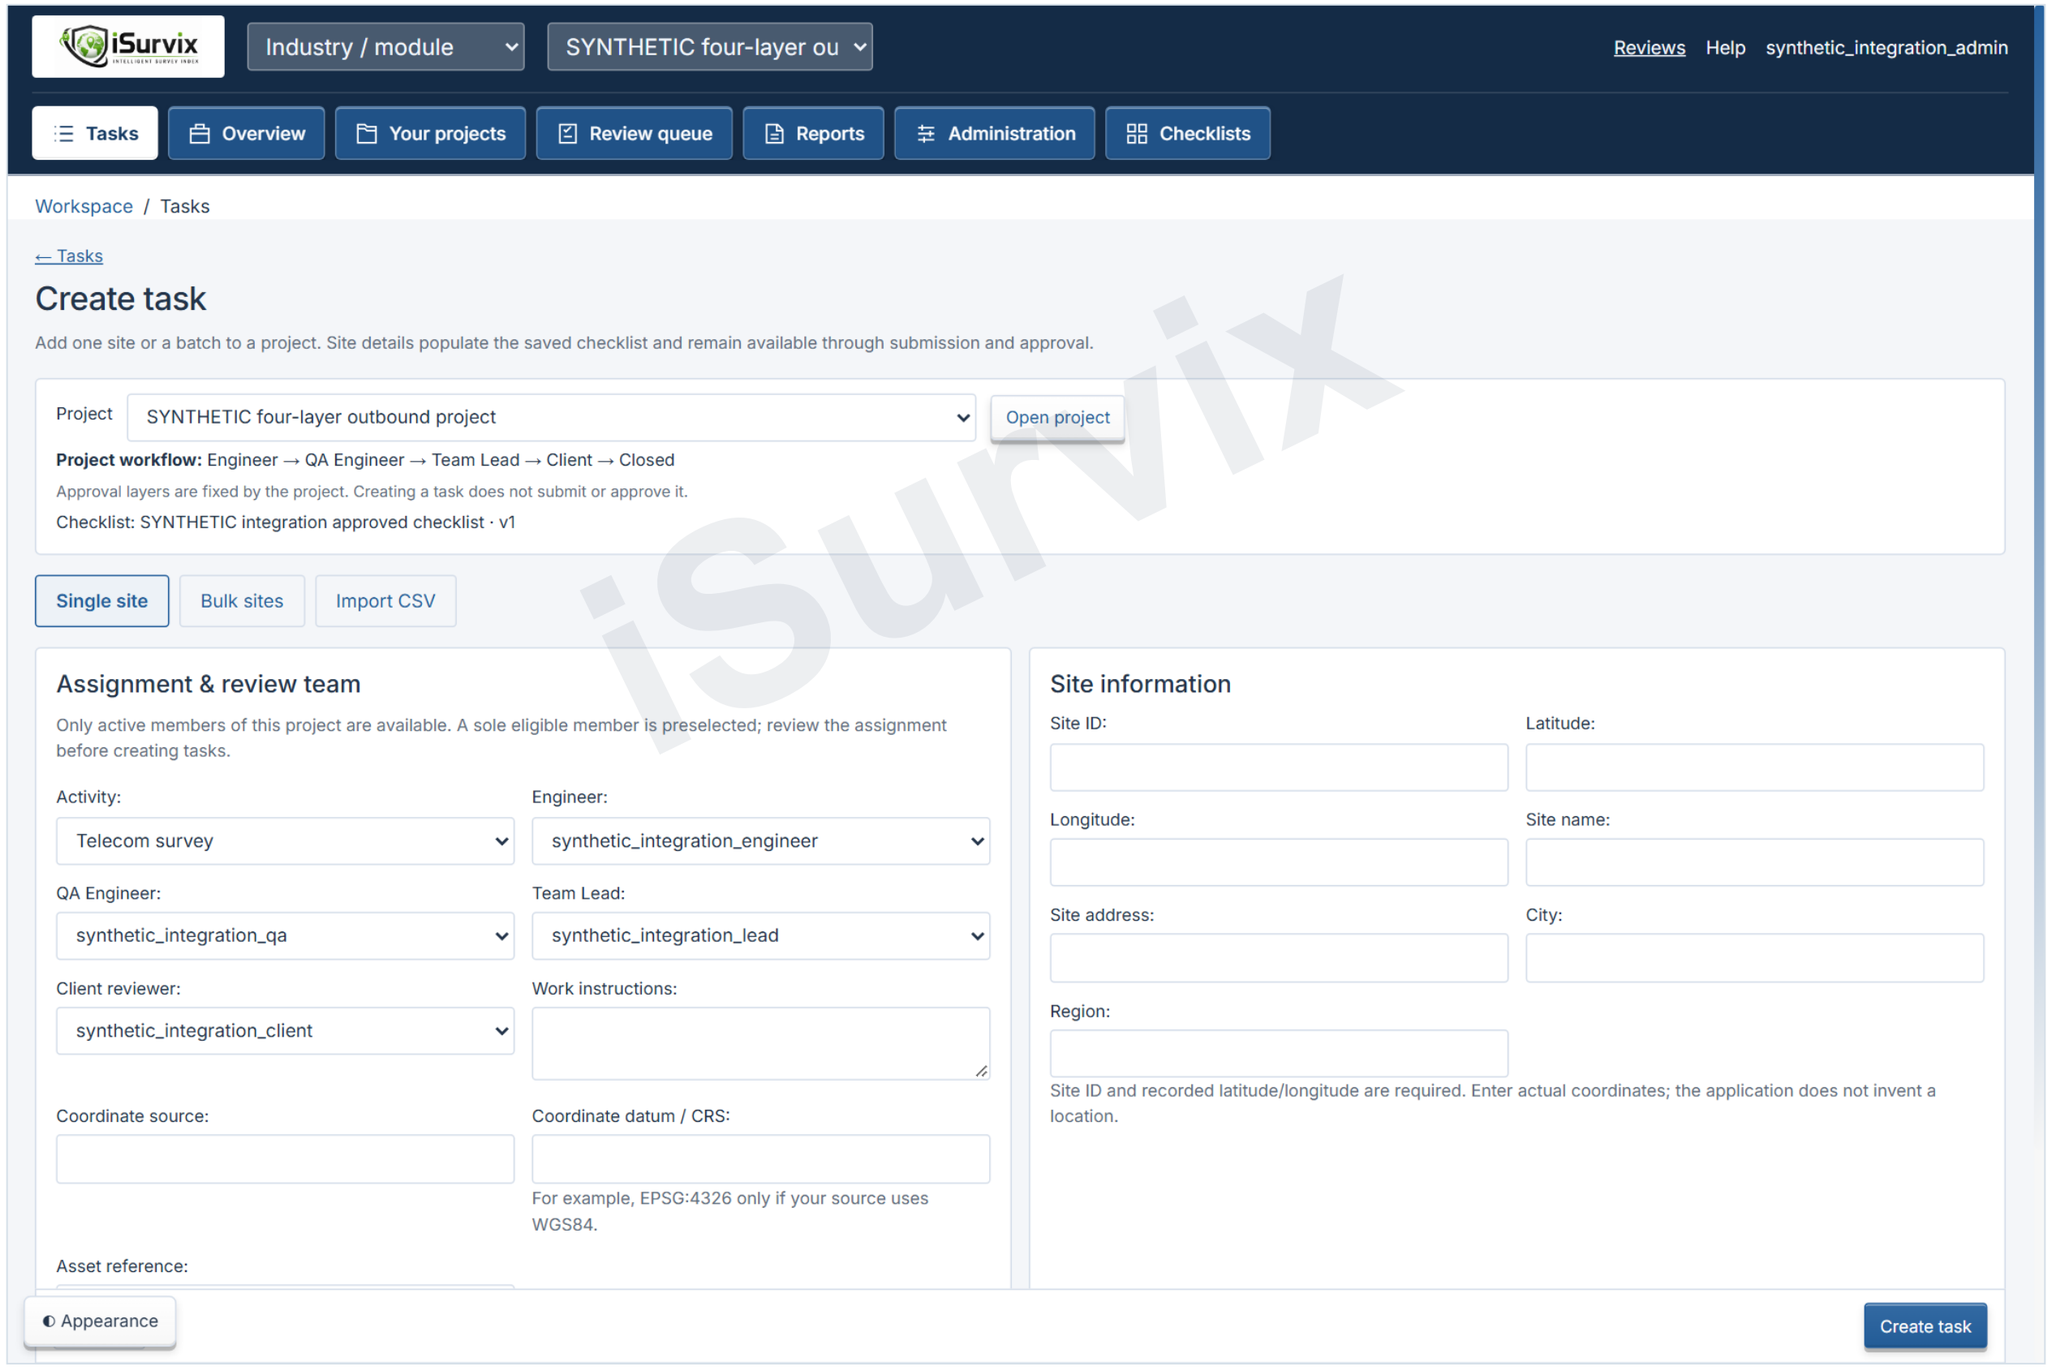

DESKTOP | 1440 x 960 viewport | Current application capture

PROJECT ADMIN

Create one site task

Enter site ID and basic information, assign the Engineer and reviewers, then create the saved task.

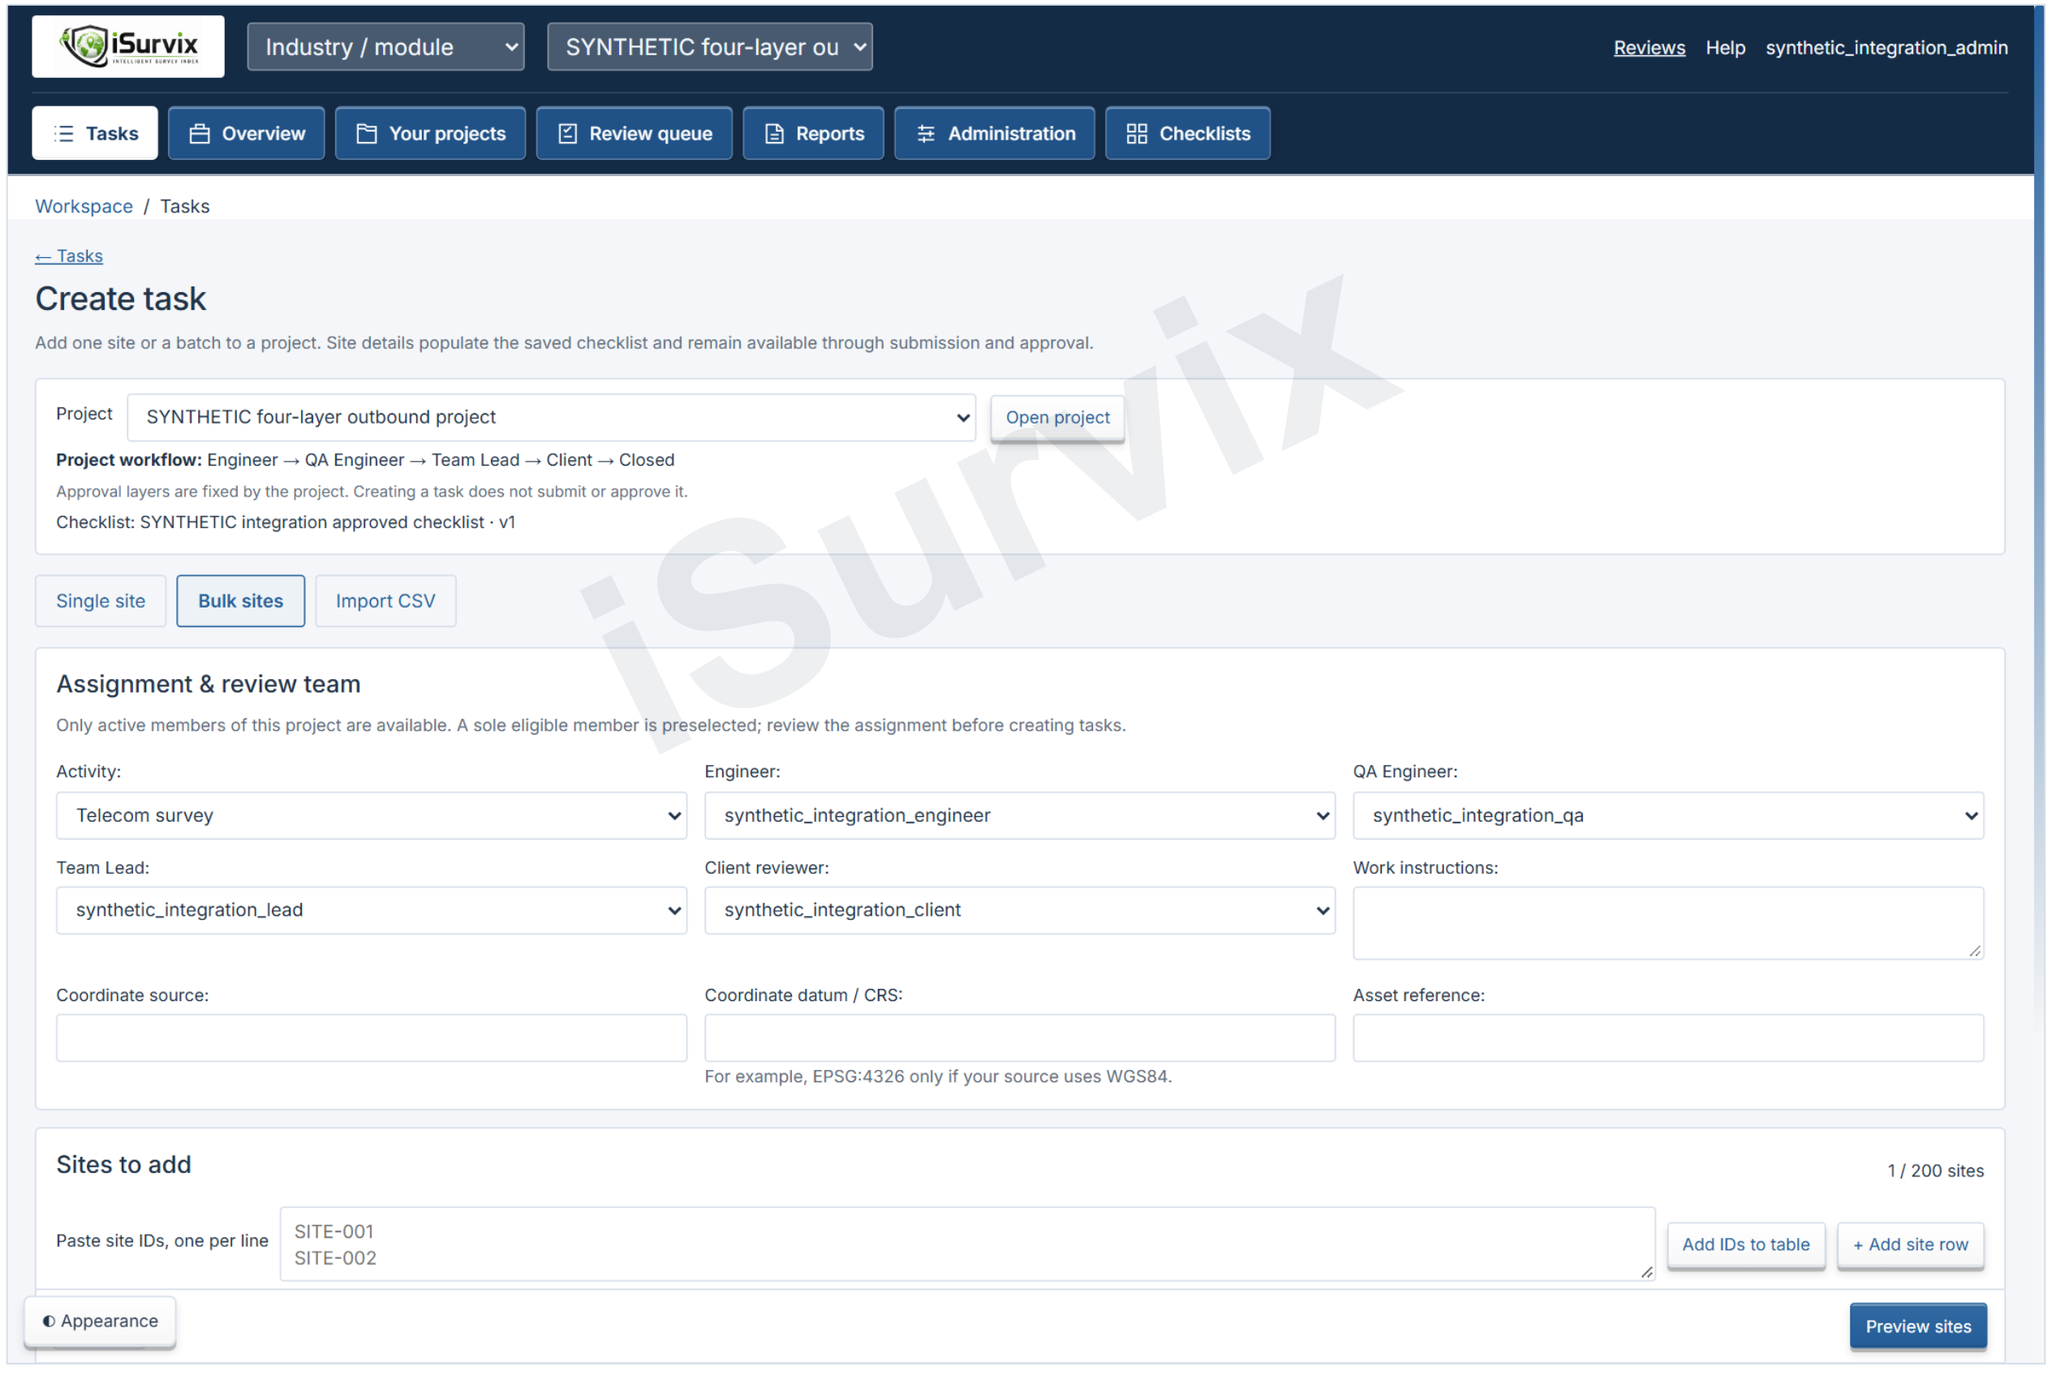

DESKTOP | 1440 x 960 viewport | Current application capture

PROJECT ADMIN

Create site tasks in bulk

Enter a site table and preview the batch before creating tasks with the project workflow.

DESKTOP | 1440 x 960 viewport | Current application capture

PROJECT ADMIN

Bulk site table

Paste site IDs, complete their basic details, then preview the batch before saving.

Project workflow: Engineer → QA Engineer → Team Lead → Client → Closed

Approval layers are fixed by the project. Creating a task does not submit or approve it.

Checklist: SYNTHETIC integration approved checklist · v1

DESKTOP | 1440 x 960 viewport | Current application capture

ENGINEER

Extracted records and corrections

Inspect source-bound extracted records and record corrections with a reason.

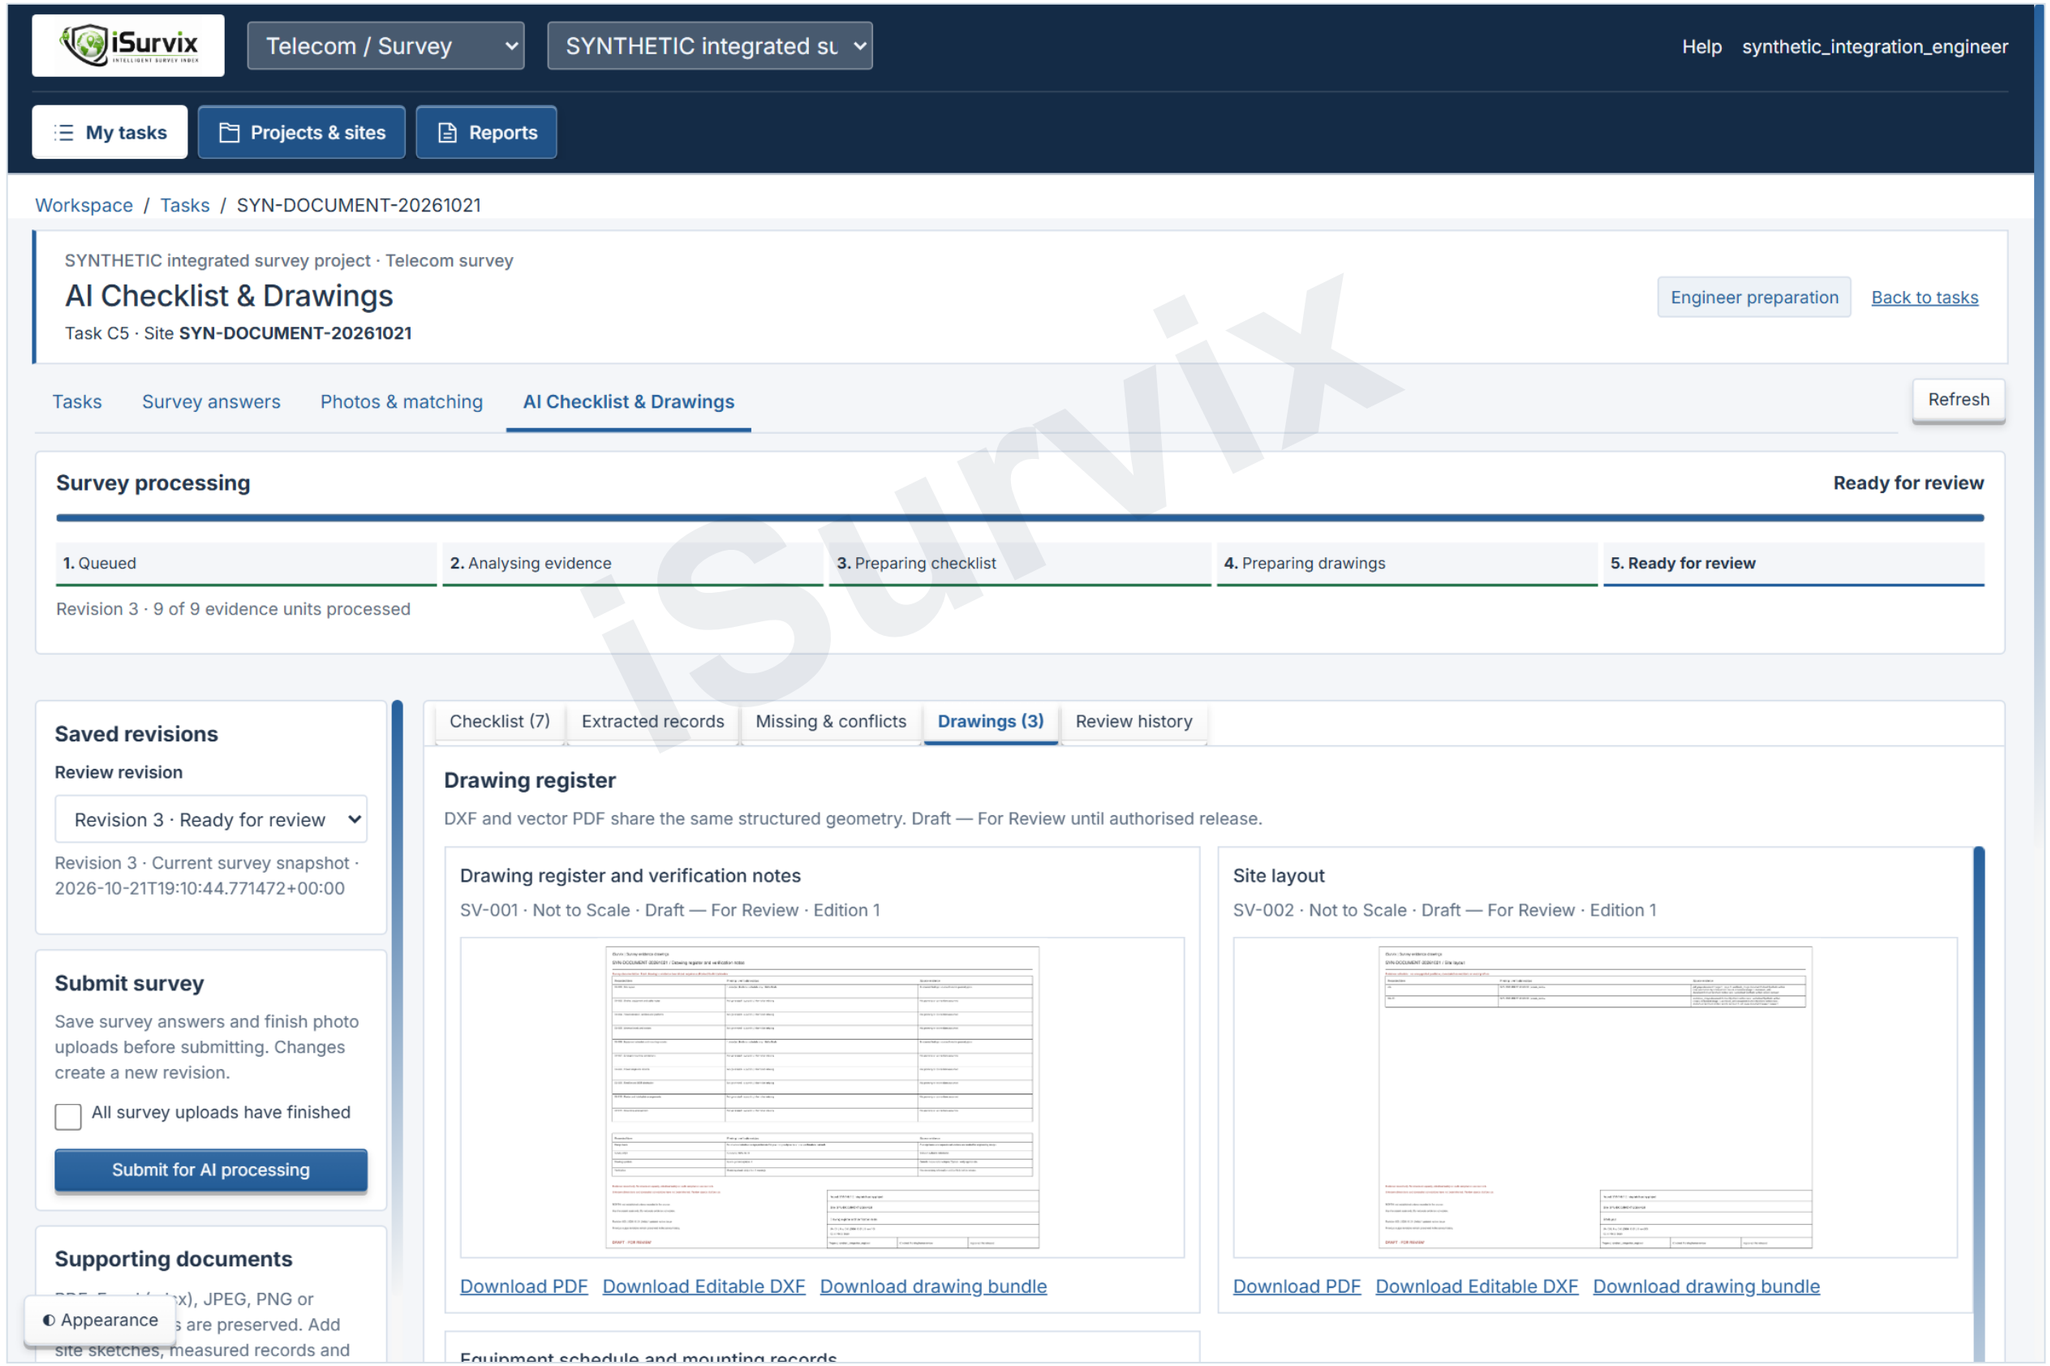

DESKTOP | 1440 x 960 viewport | Current application capture

ENGINEER

Draft drawing outputs

Inspect PDF/DXF previews and missing information. Drafts require technical review and authorised release.

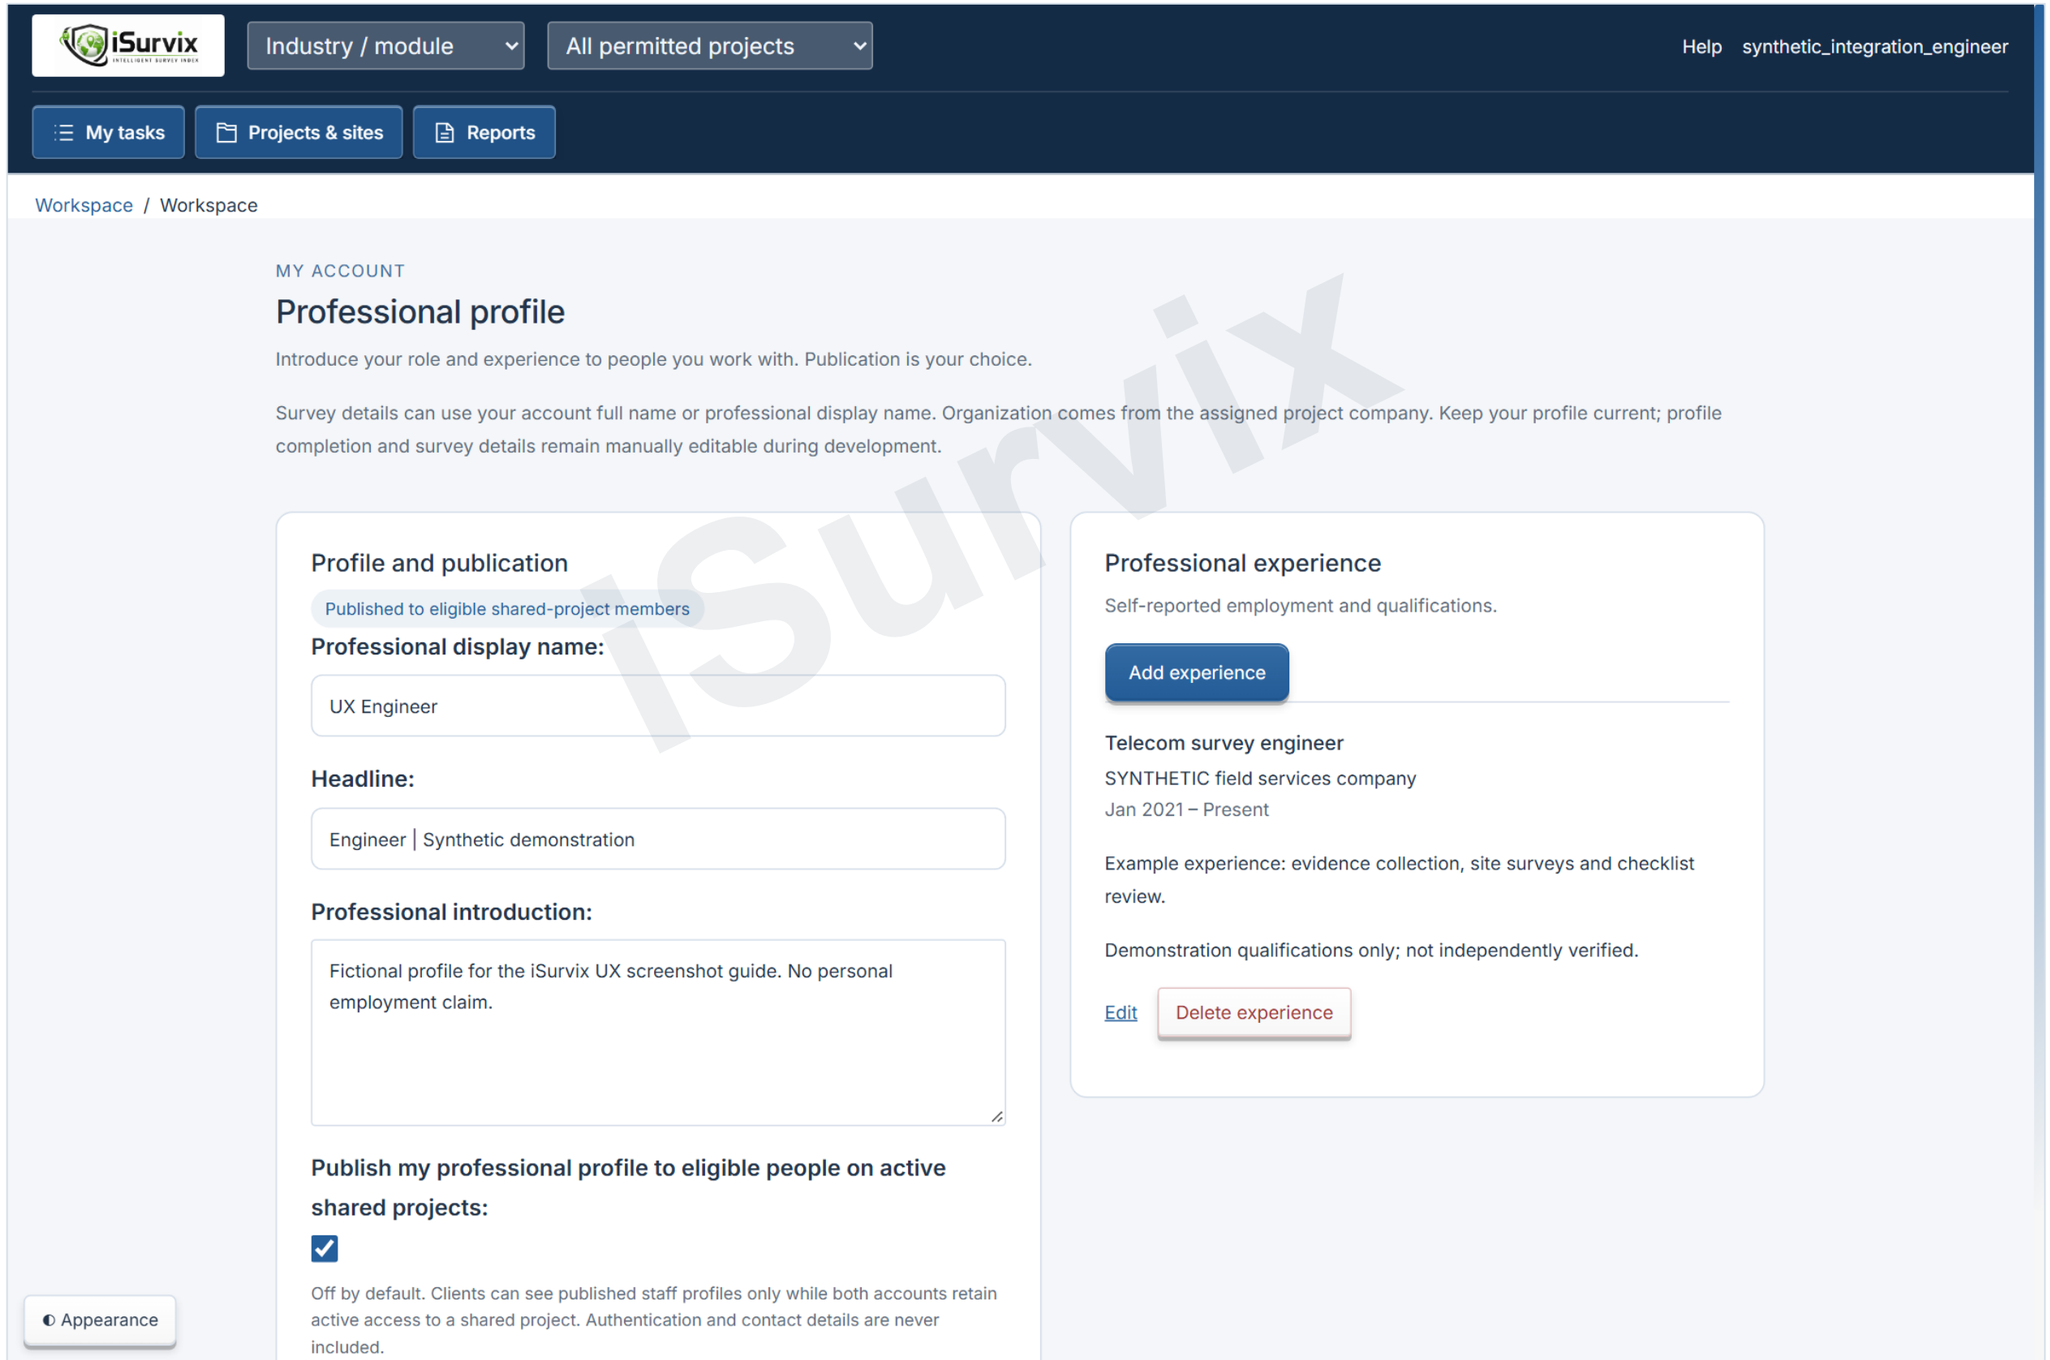

DESKTOP | 1440 x 960 viewport | Current application capture

ENGINEER

Engineer profile and experience

Maintain professional information and self-reported experience. Publication controls shared-project visibility.

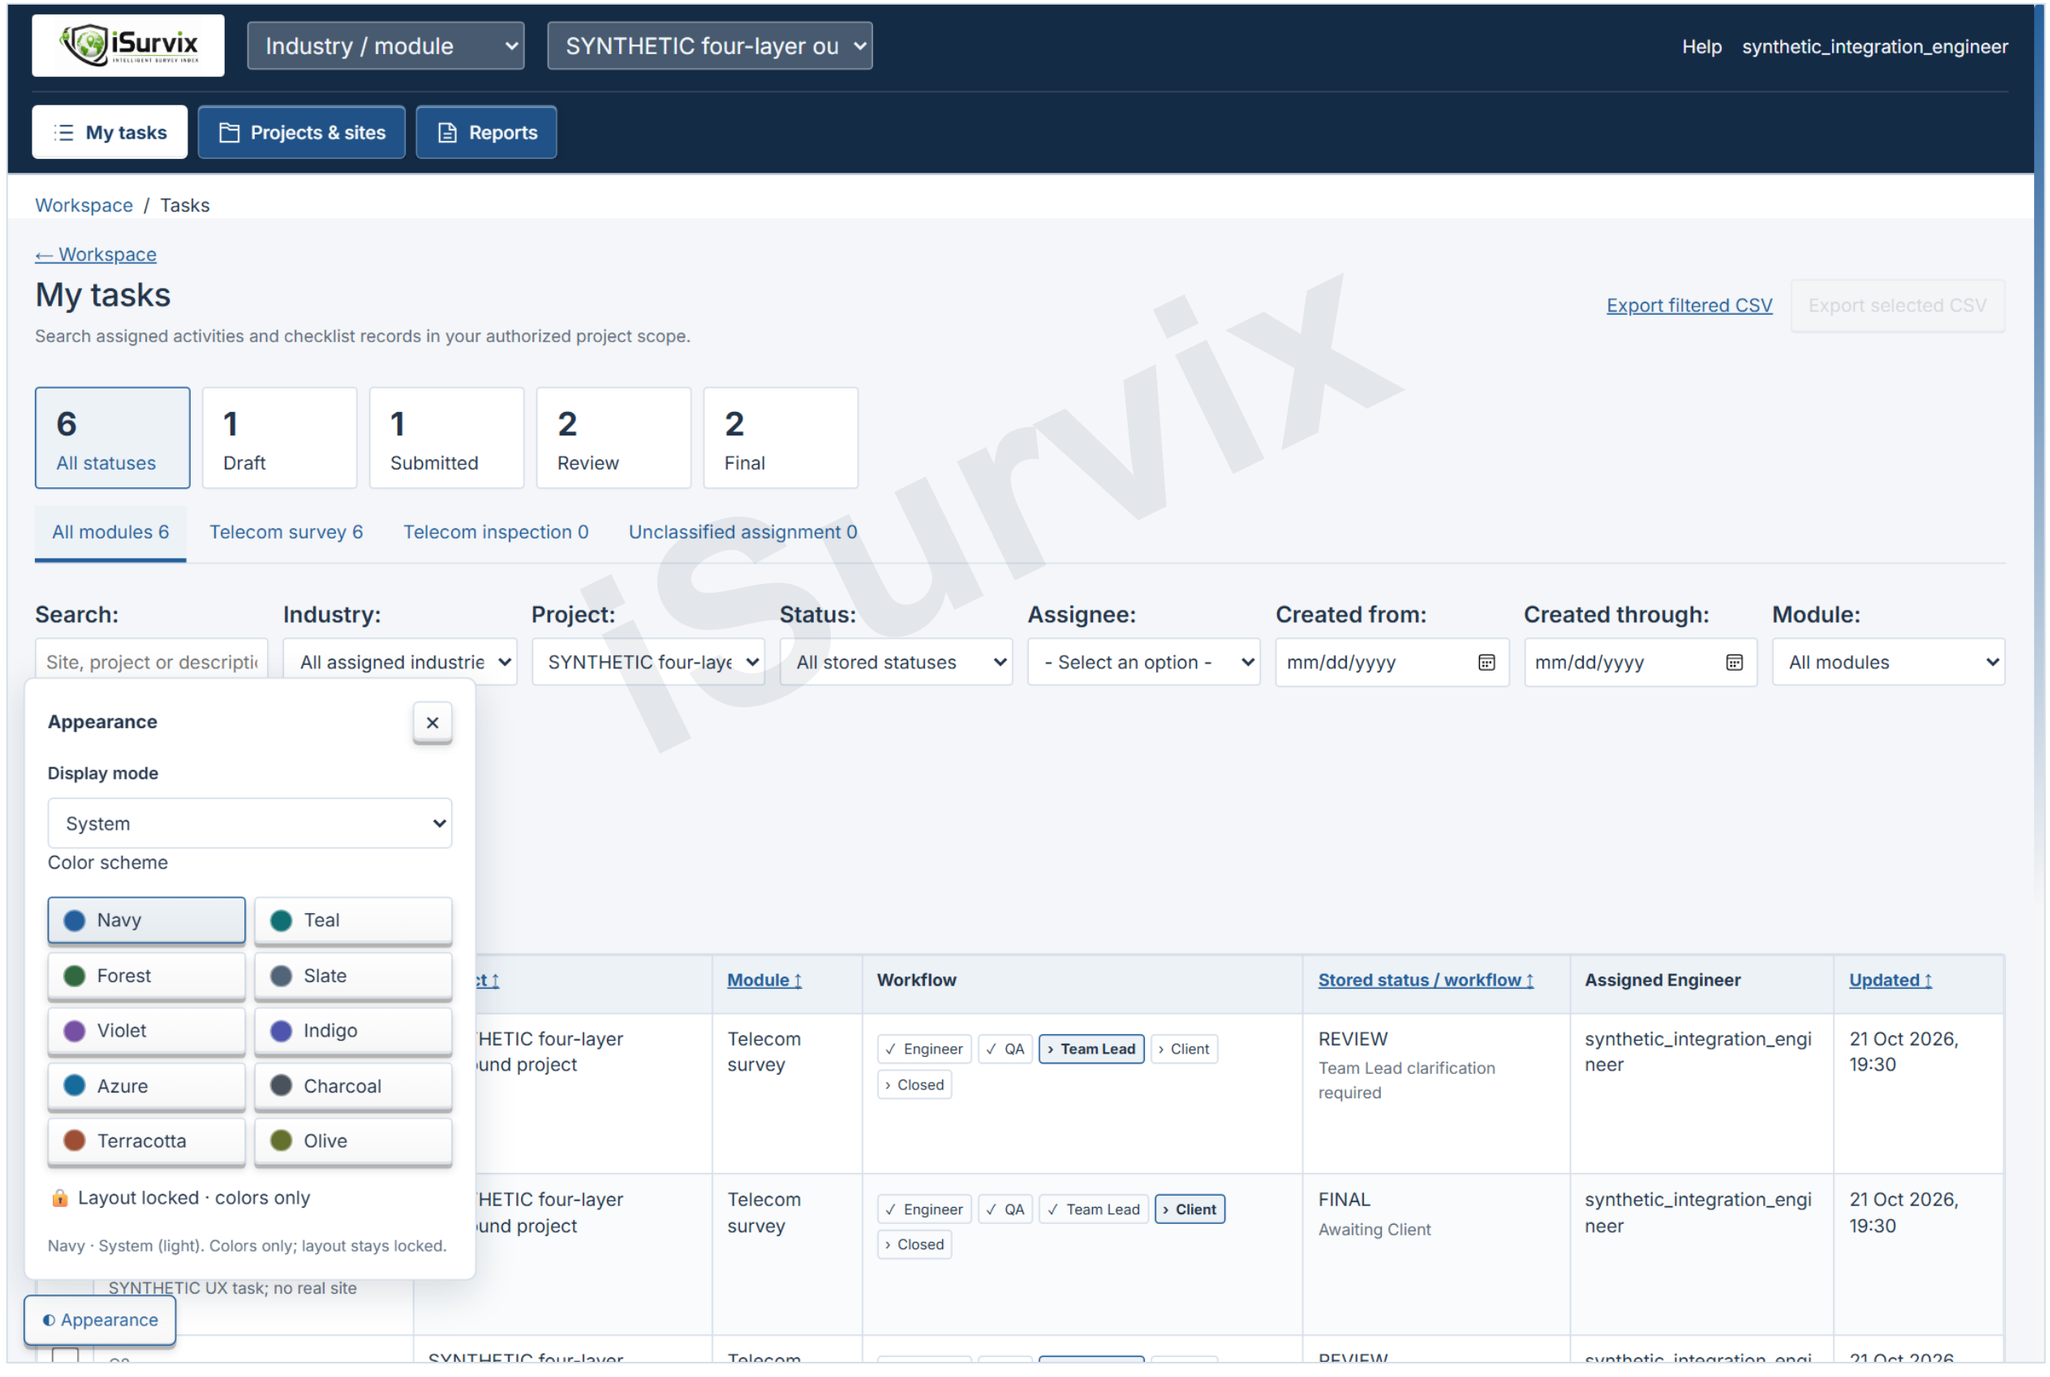

DESKTOP | 1440 x 960 viewport | Current application capture

ENGINEER

System appearance and fixed layout

Choose a colour scheme and light/dark/system appearance. The layout remains fixed.

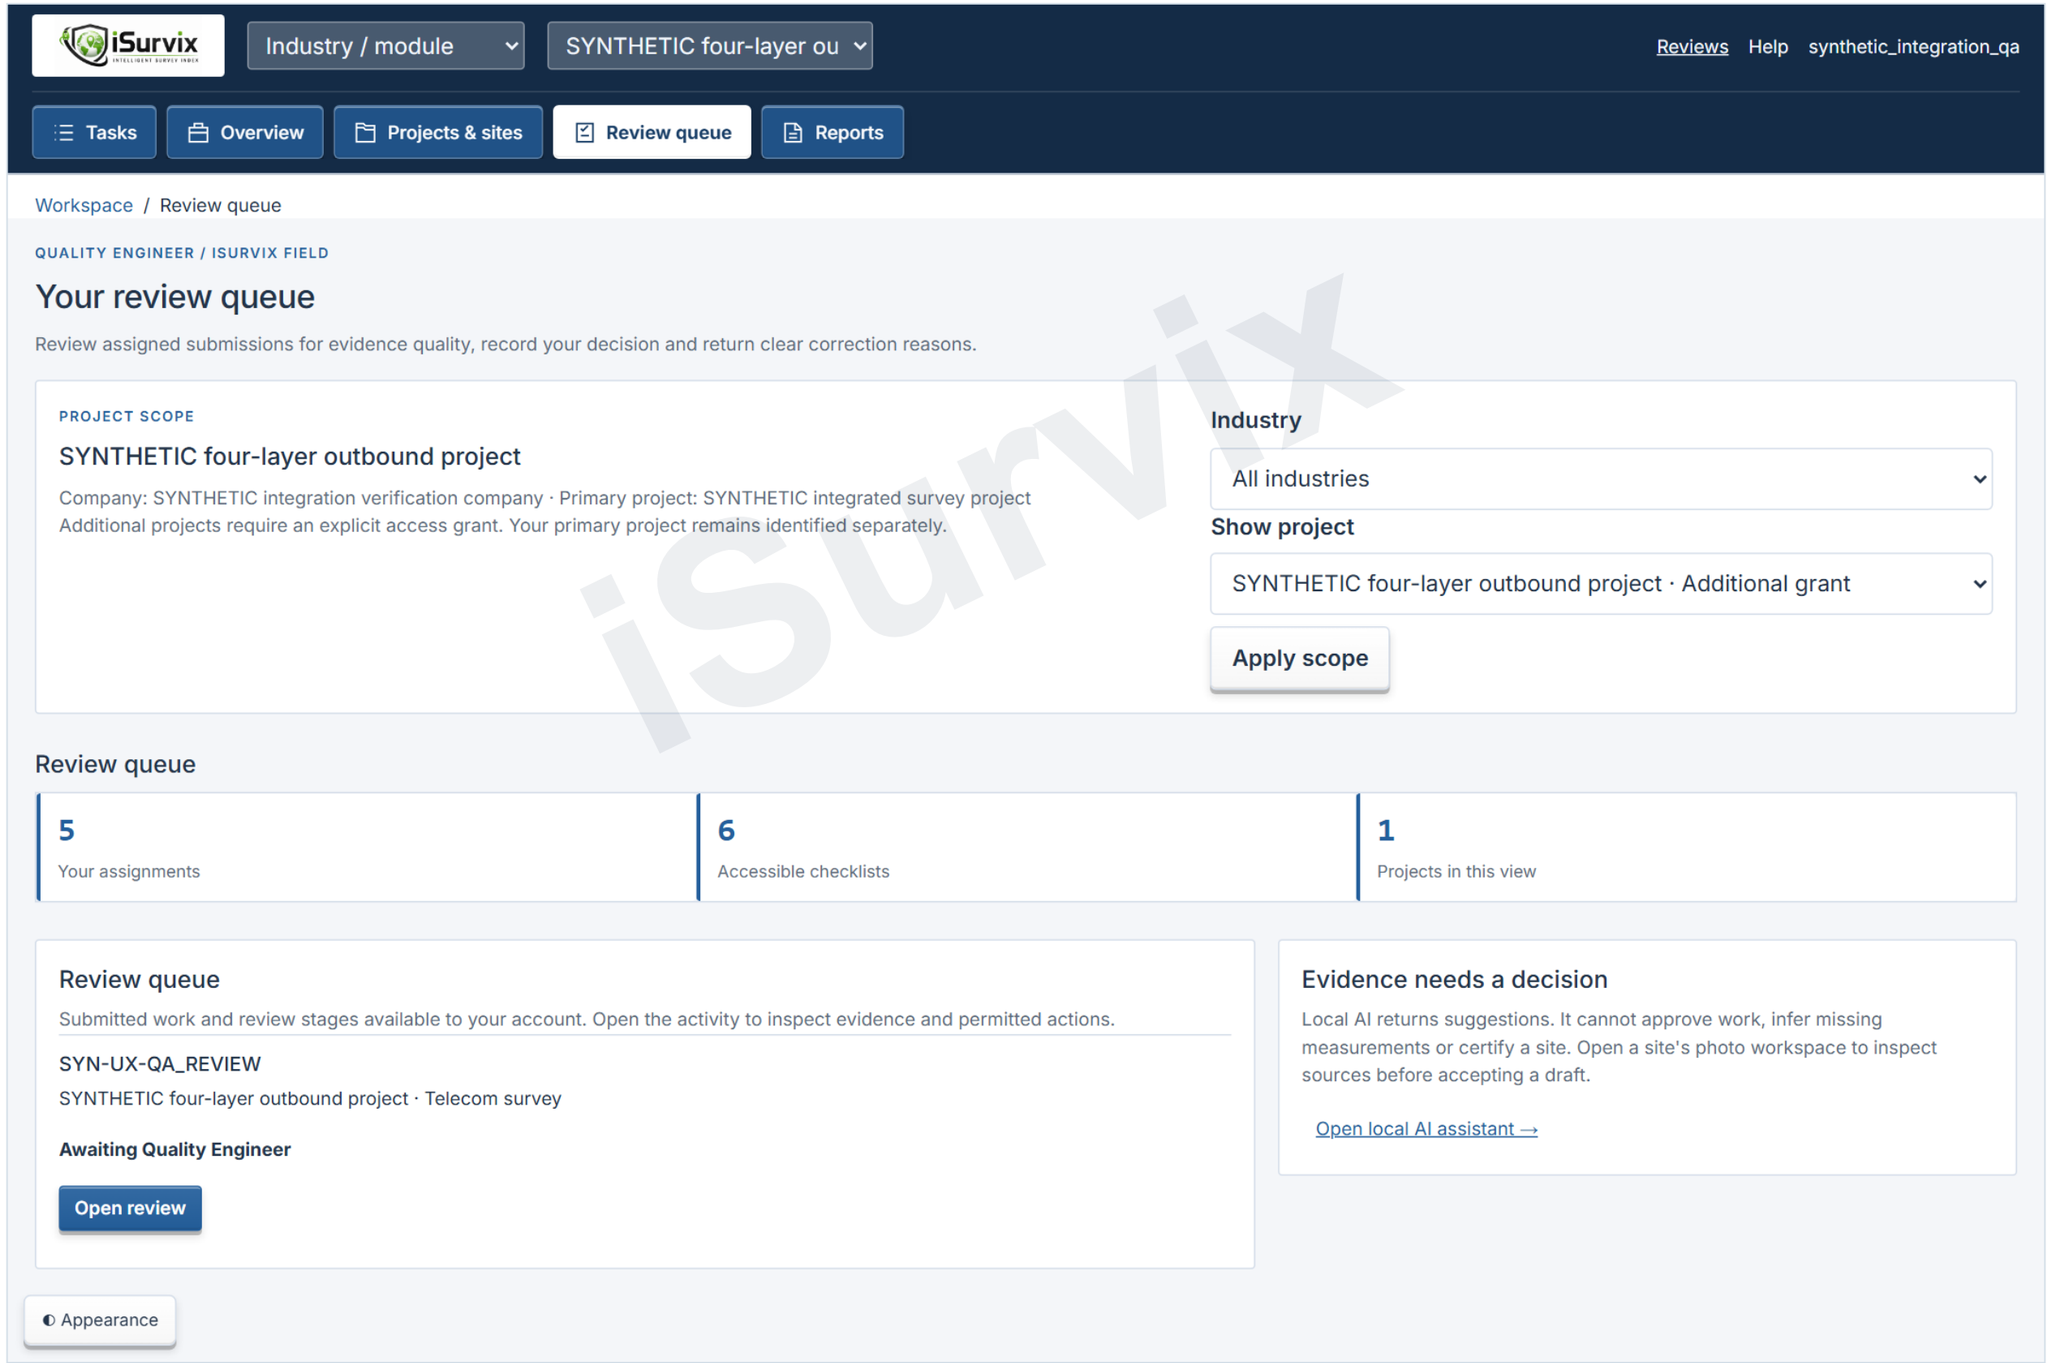

DESKTOP | 1440 x 960 viewport | Current application capture

QA ENGINEER

QA review queue

Open work submitted by the assigned Engineer.

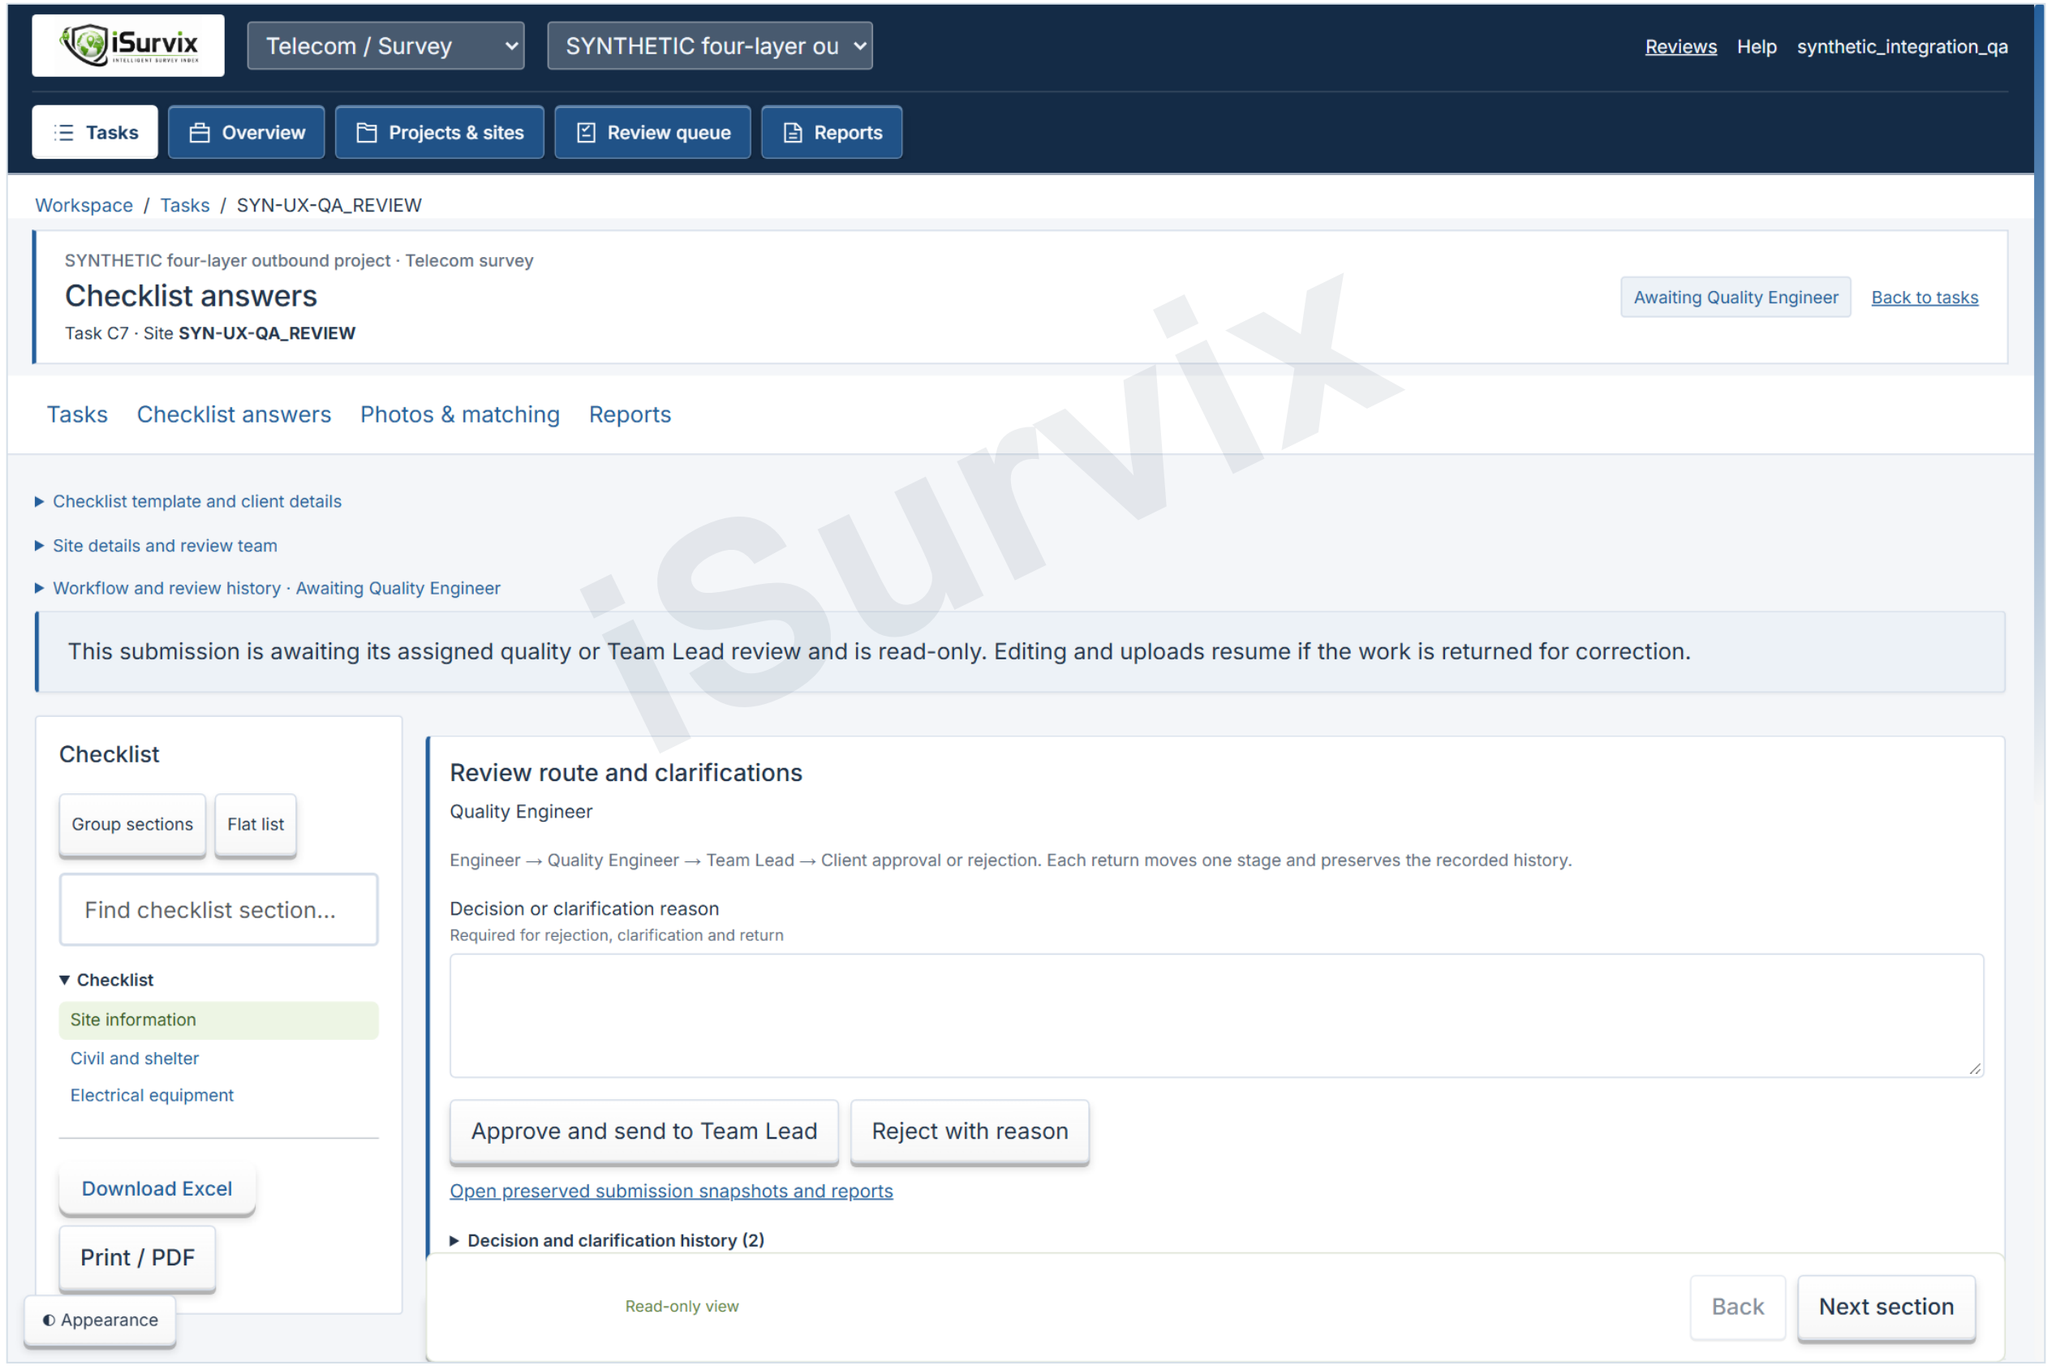

DESKTOP | 1440 x 960 viewport | Current application capture

QA ENGINEER

QA checklist review

Review submitted evidence and answers before approving or returning work one step.

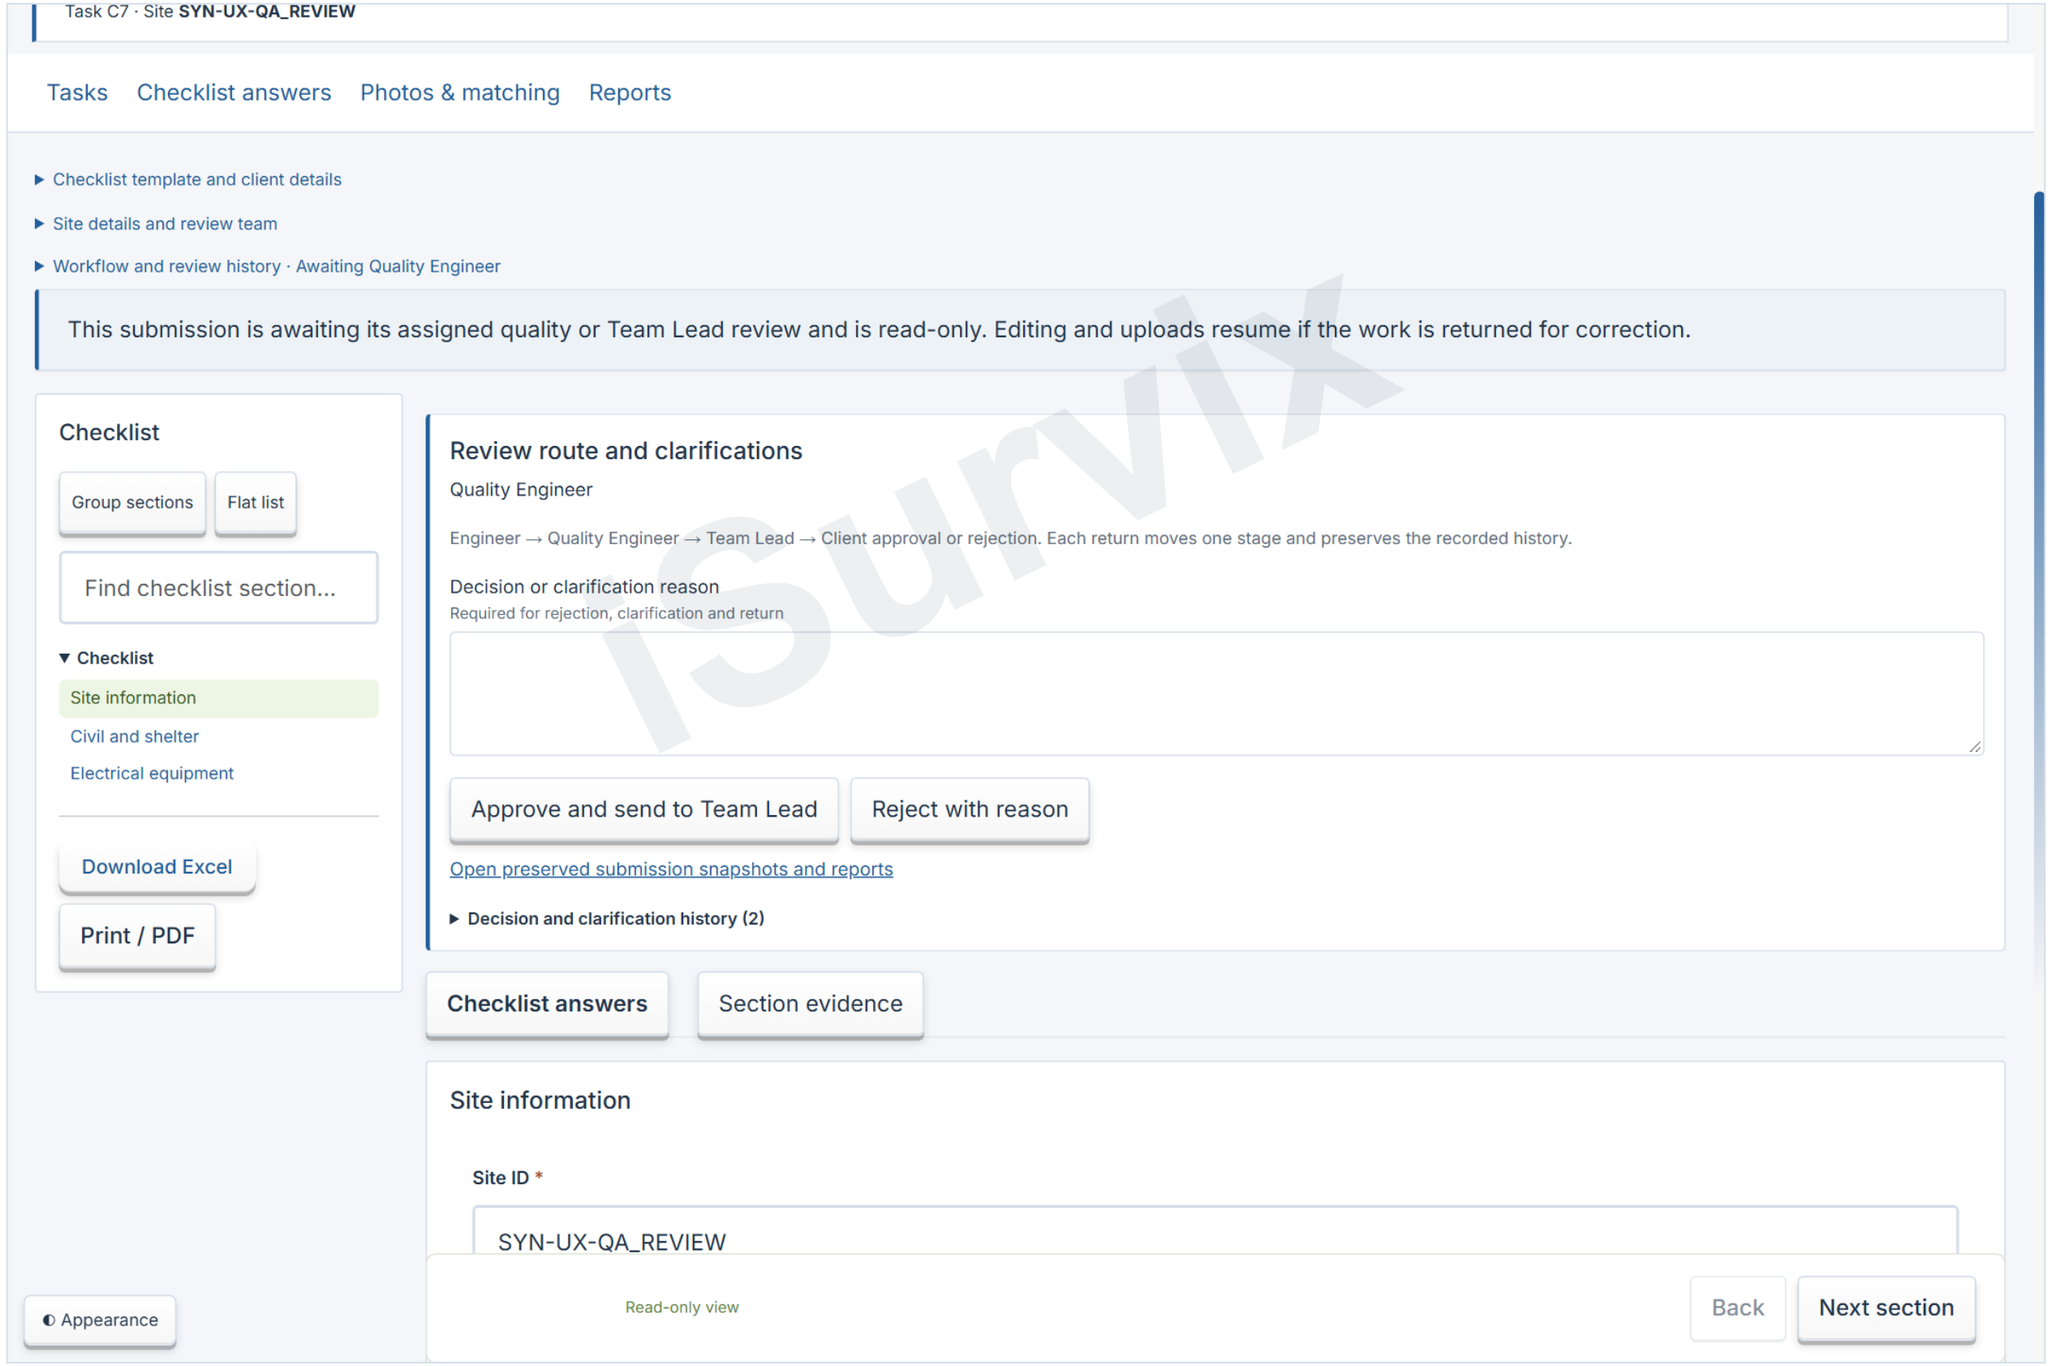

DESKTOP | 1440 x 960 viewport | Current application capture

QA ENGINEER

QA decision and comments

Approve the current review or reject with a clear reason. Rejection returns to the preceding role.

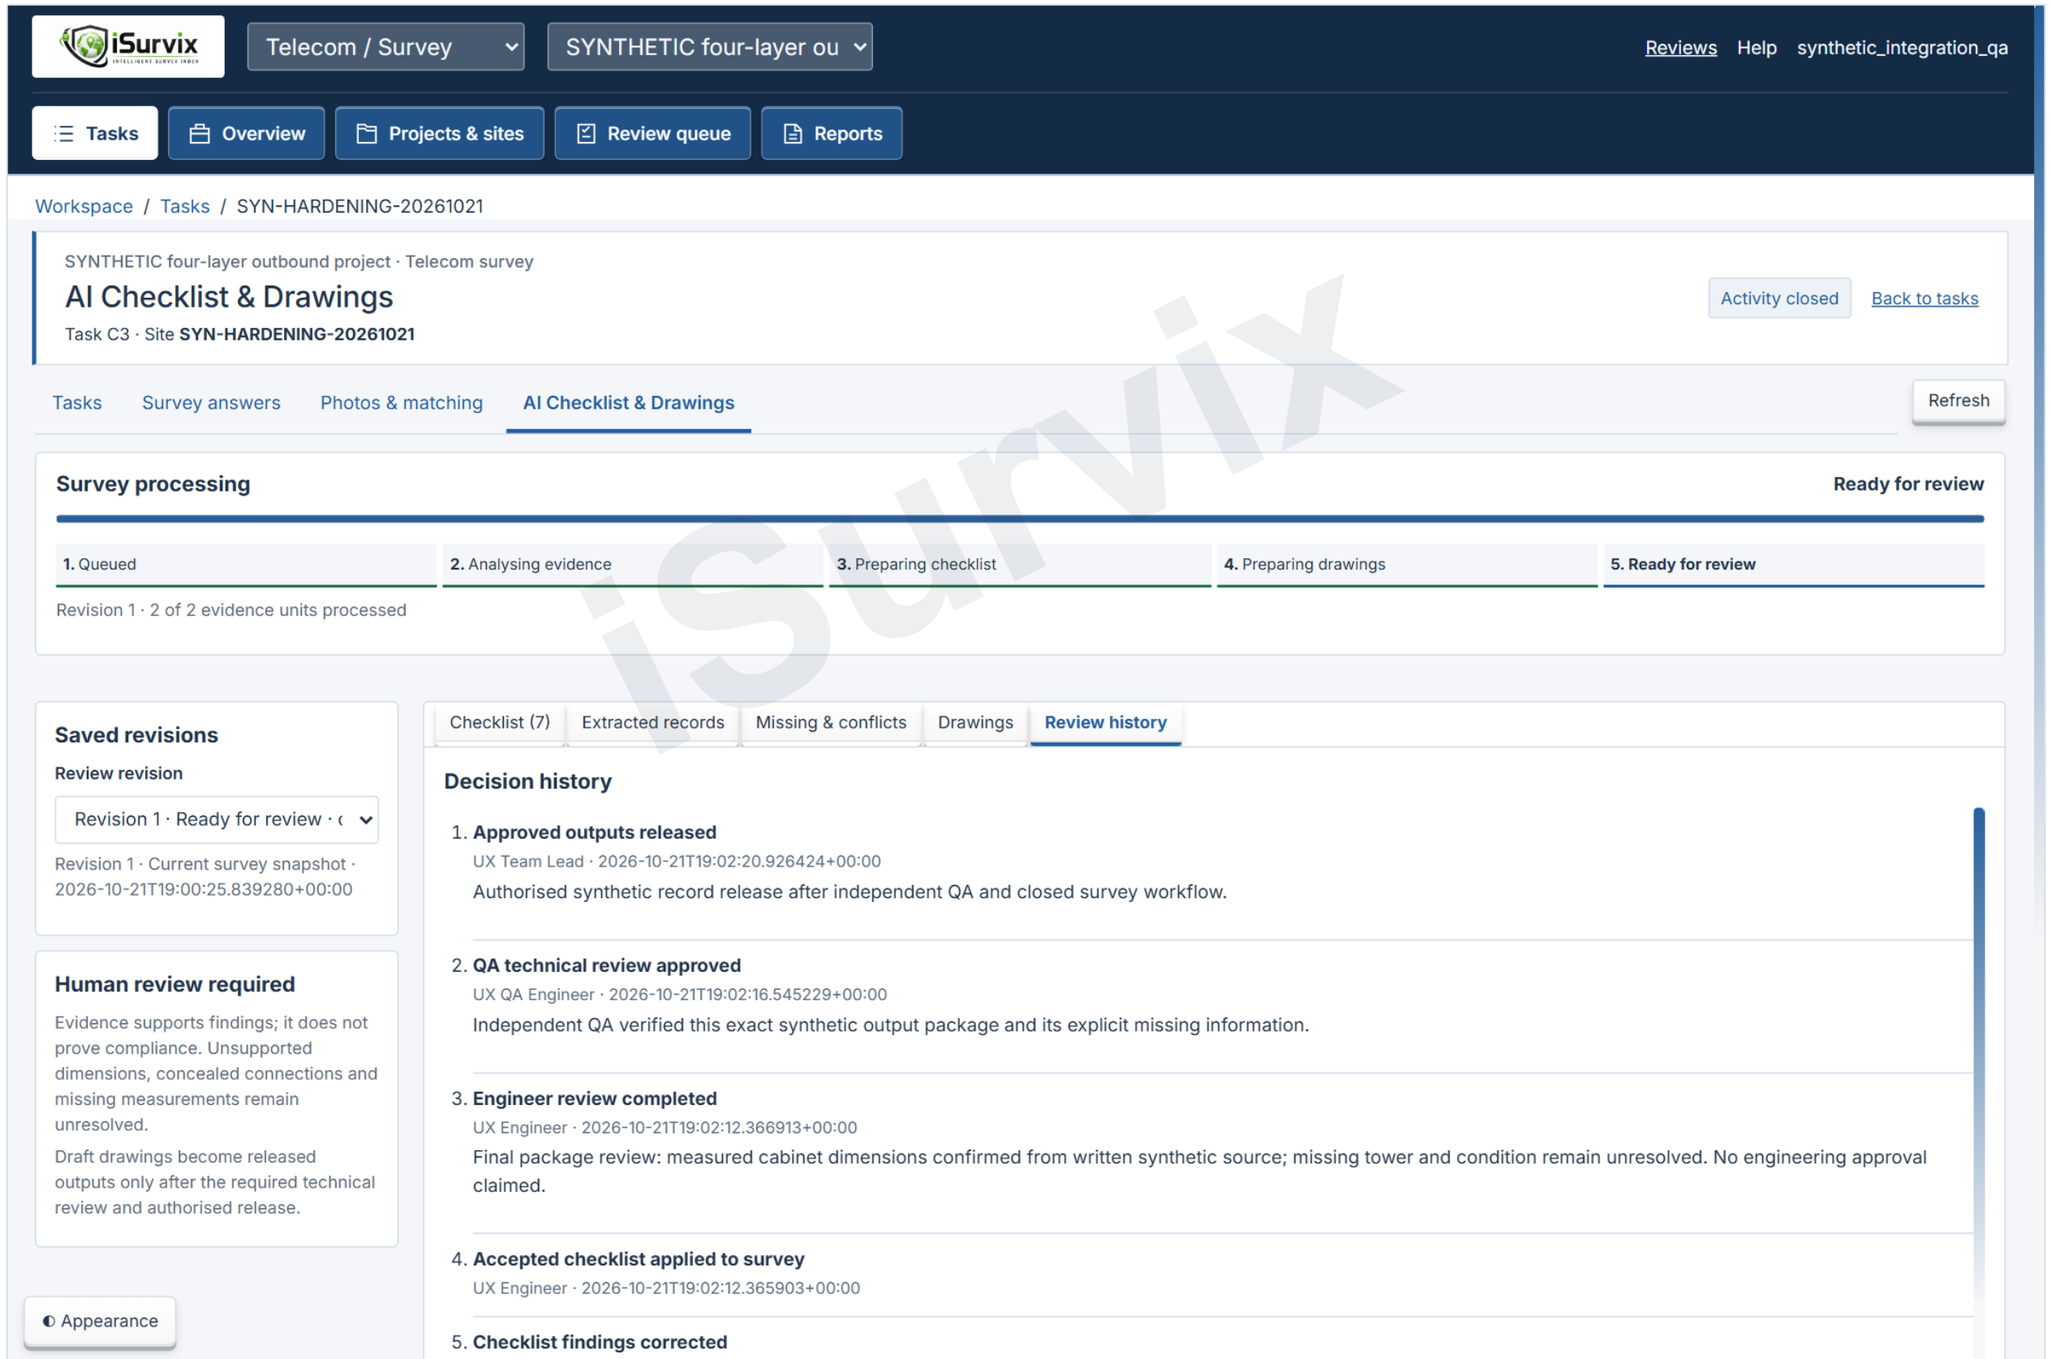

DESKTOP | 1440 x 960 viewport | Current application capture

QA ENGINEER

QA technical package view

Inspect package decisions and the reviewed output history. This captured package is already released.

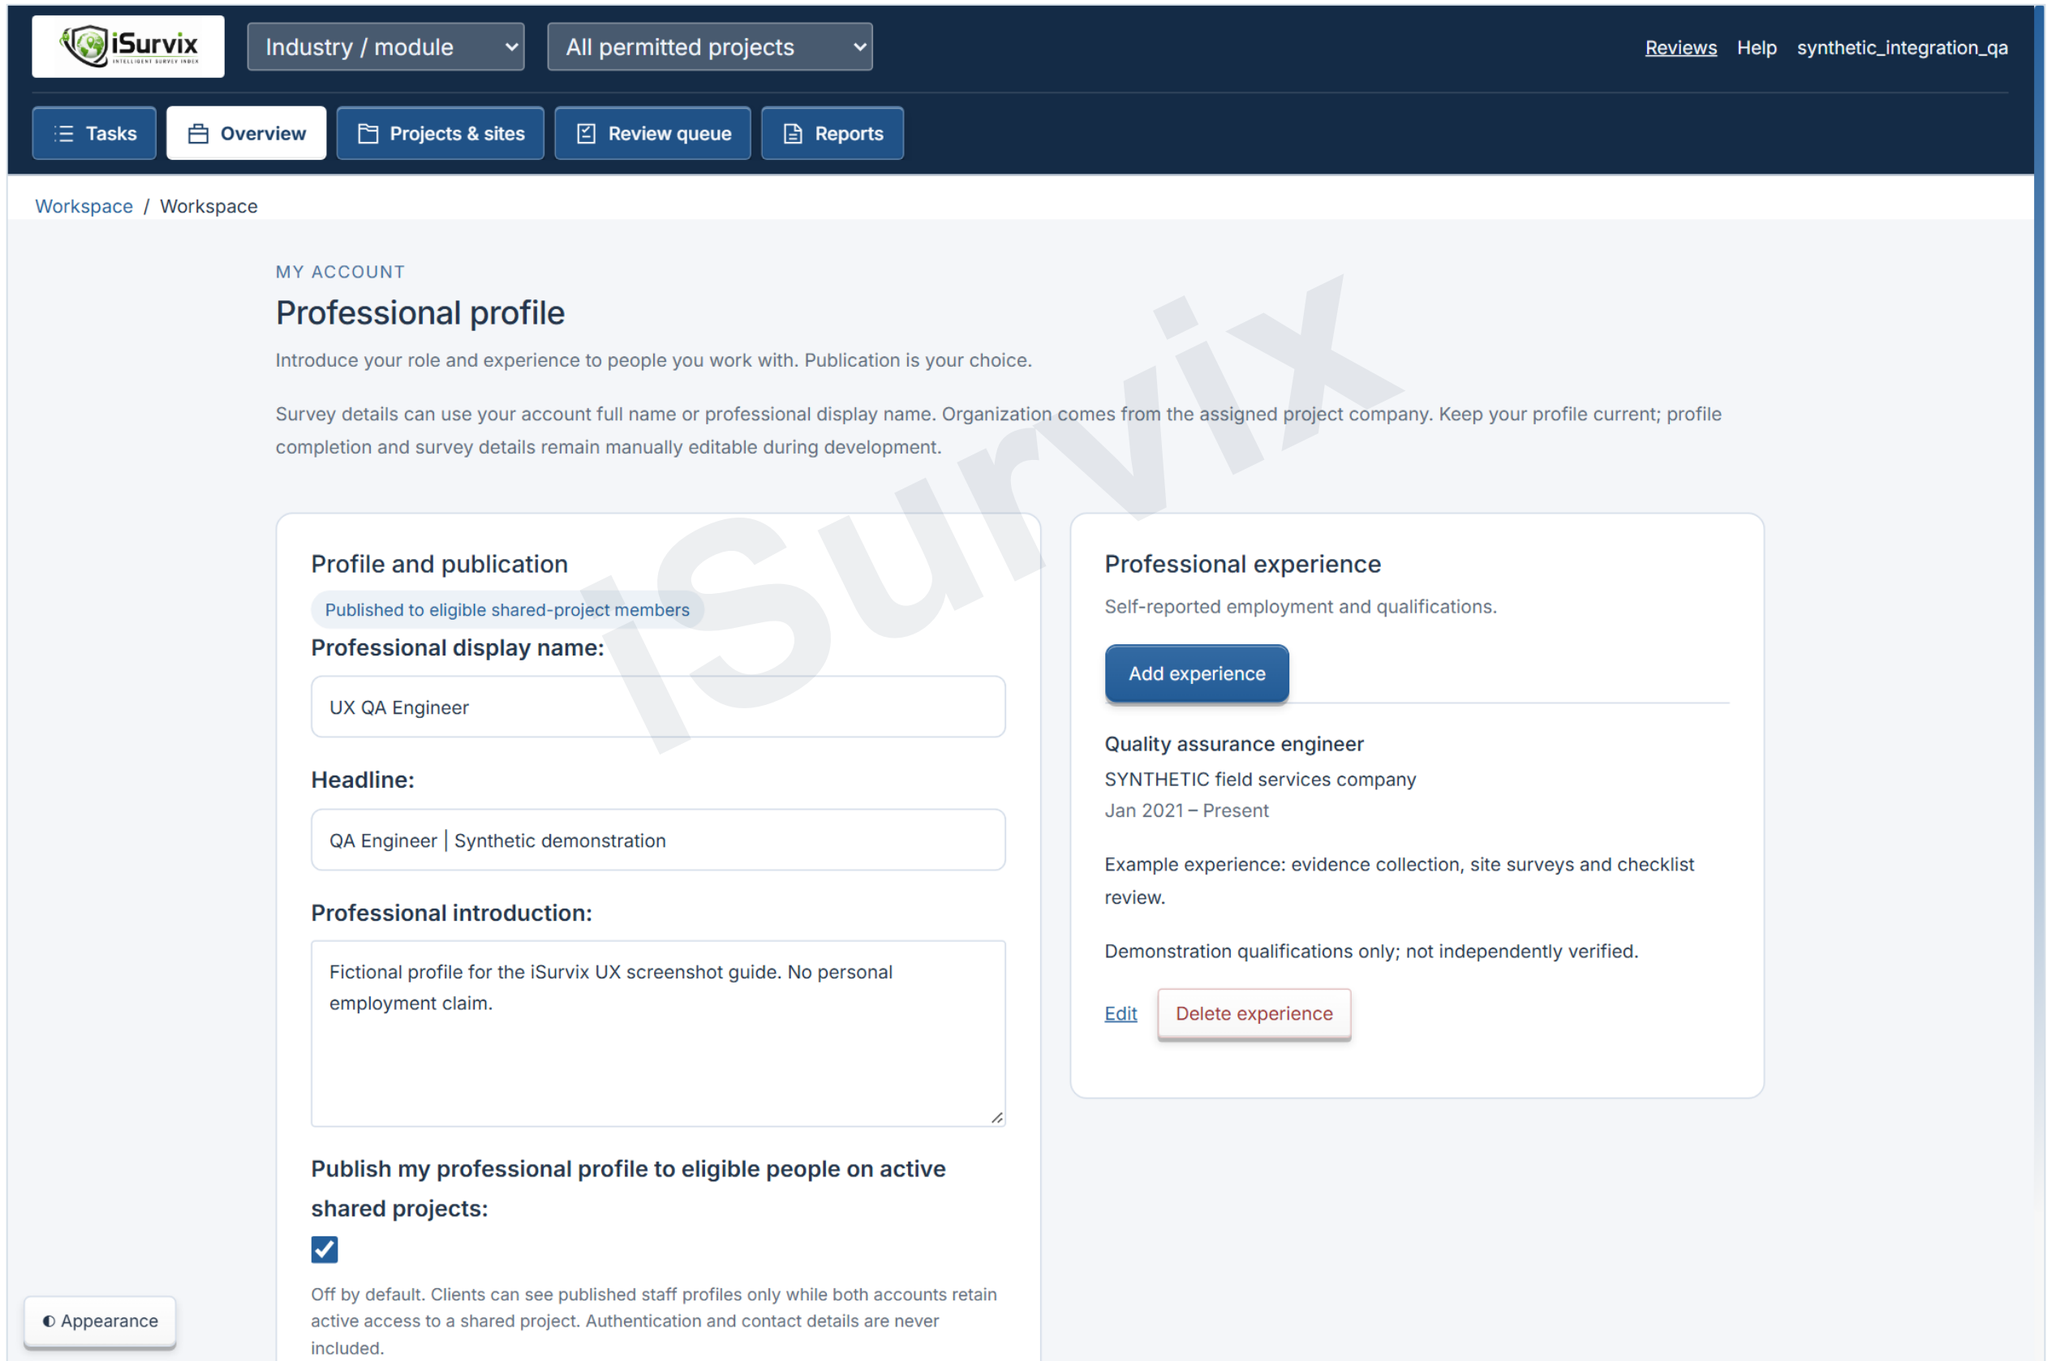

DESKTOP | 1440 x 960 viewport | Current application capture

QA ENGINEER

QA profile and experience

Add relevant experience and qualifications to the professional profile; entries remain self-reported.

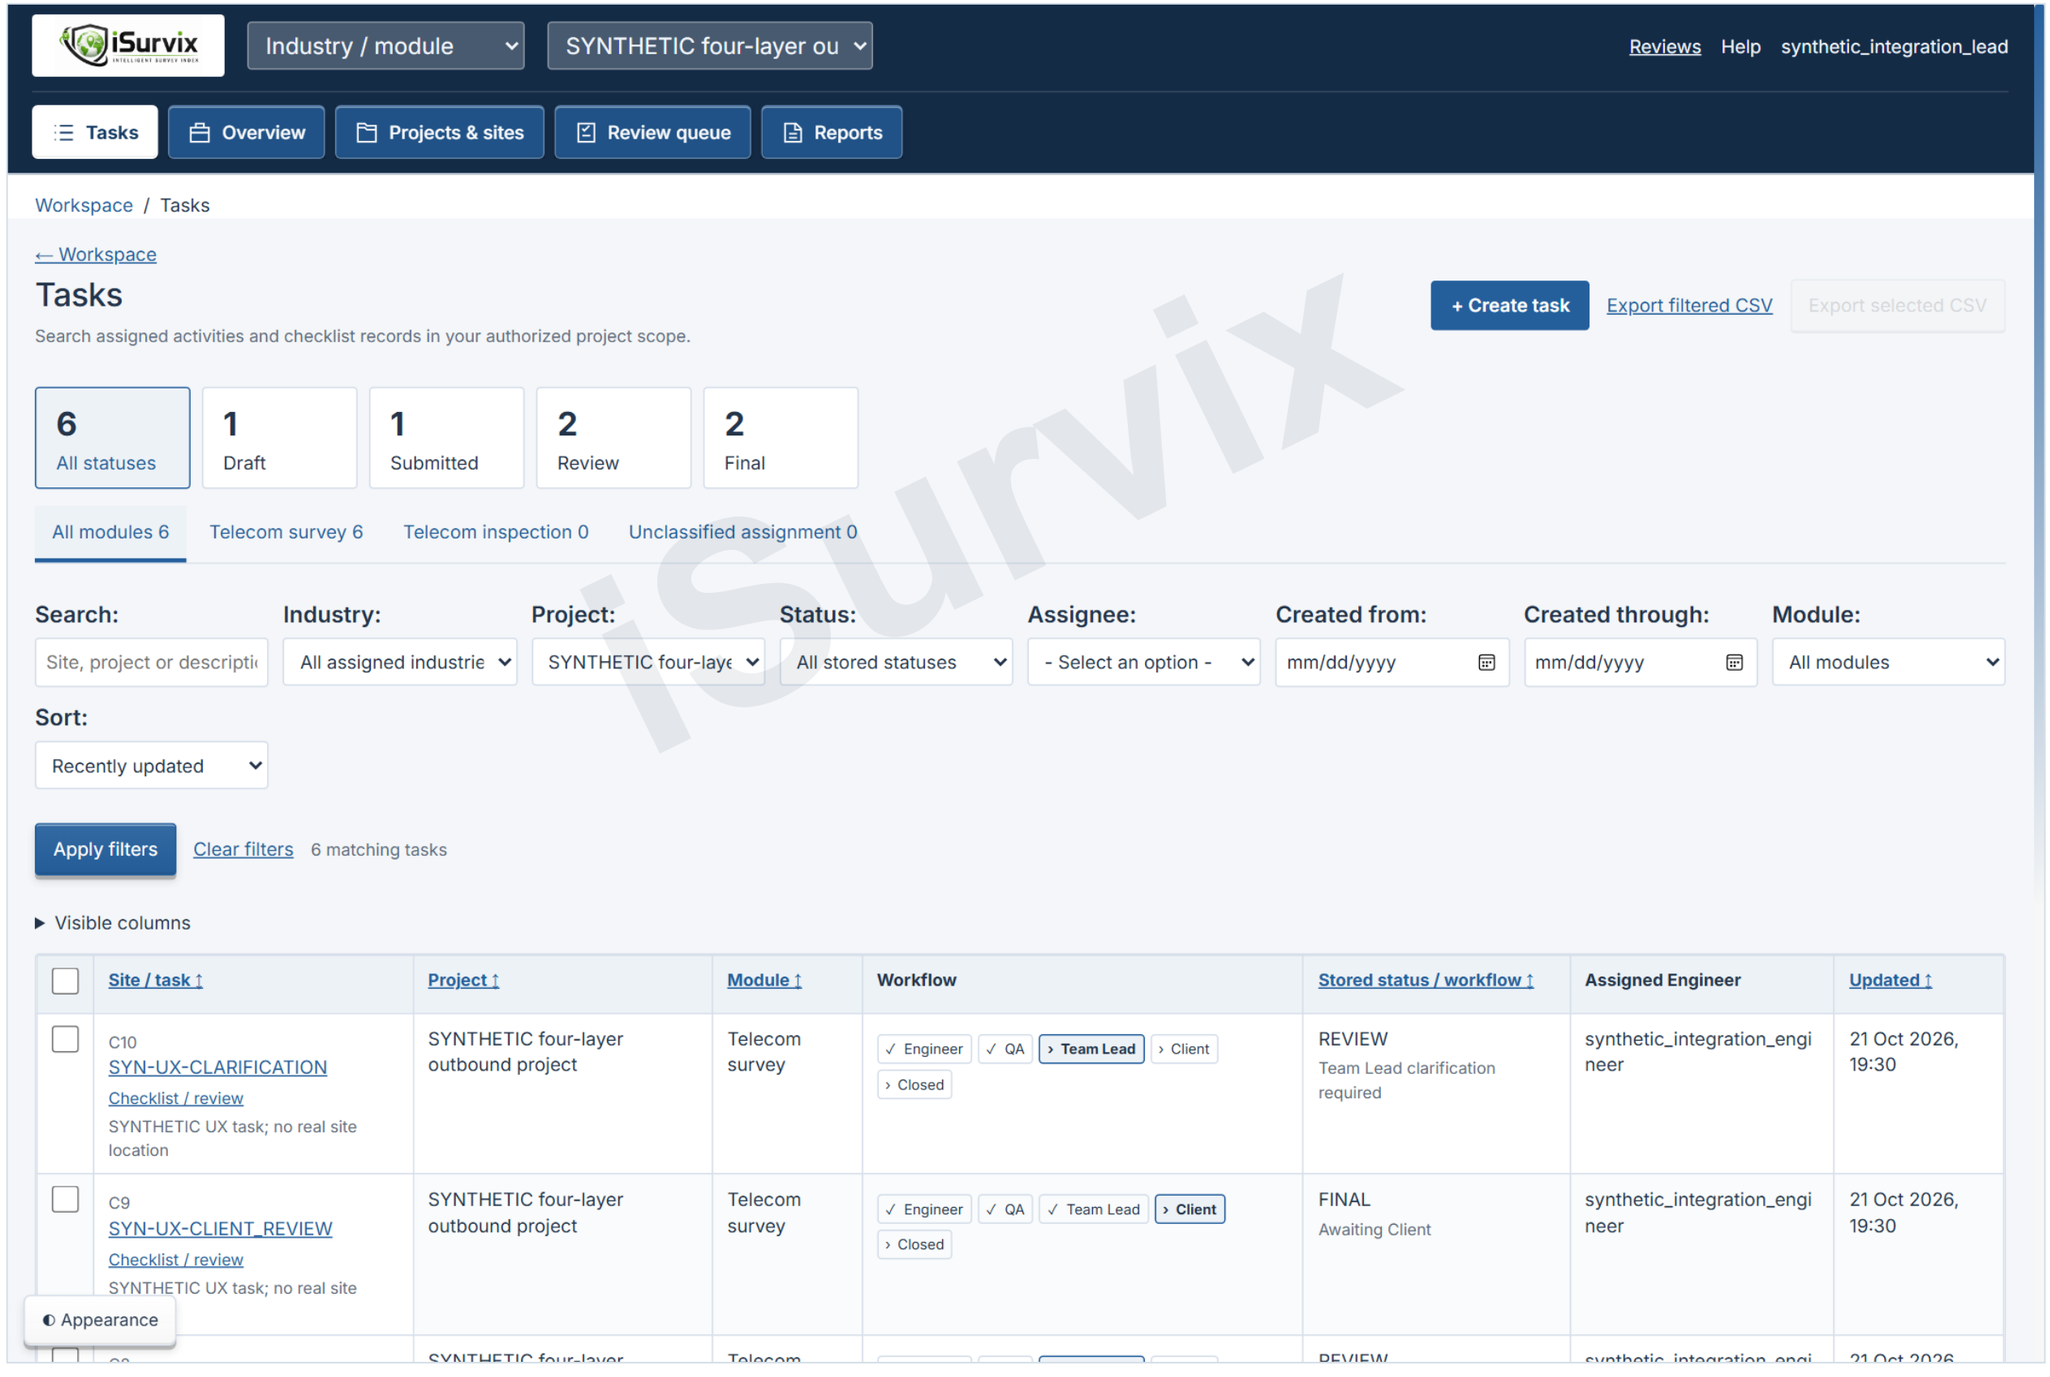

DESKTOP | 1440 x 960 viewport | Current application capture

TEAM LEAD

Team Lead task explorer

See assigned work and its current workflow stage; create or assign site tasks.

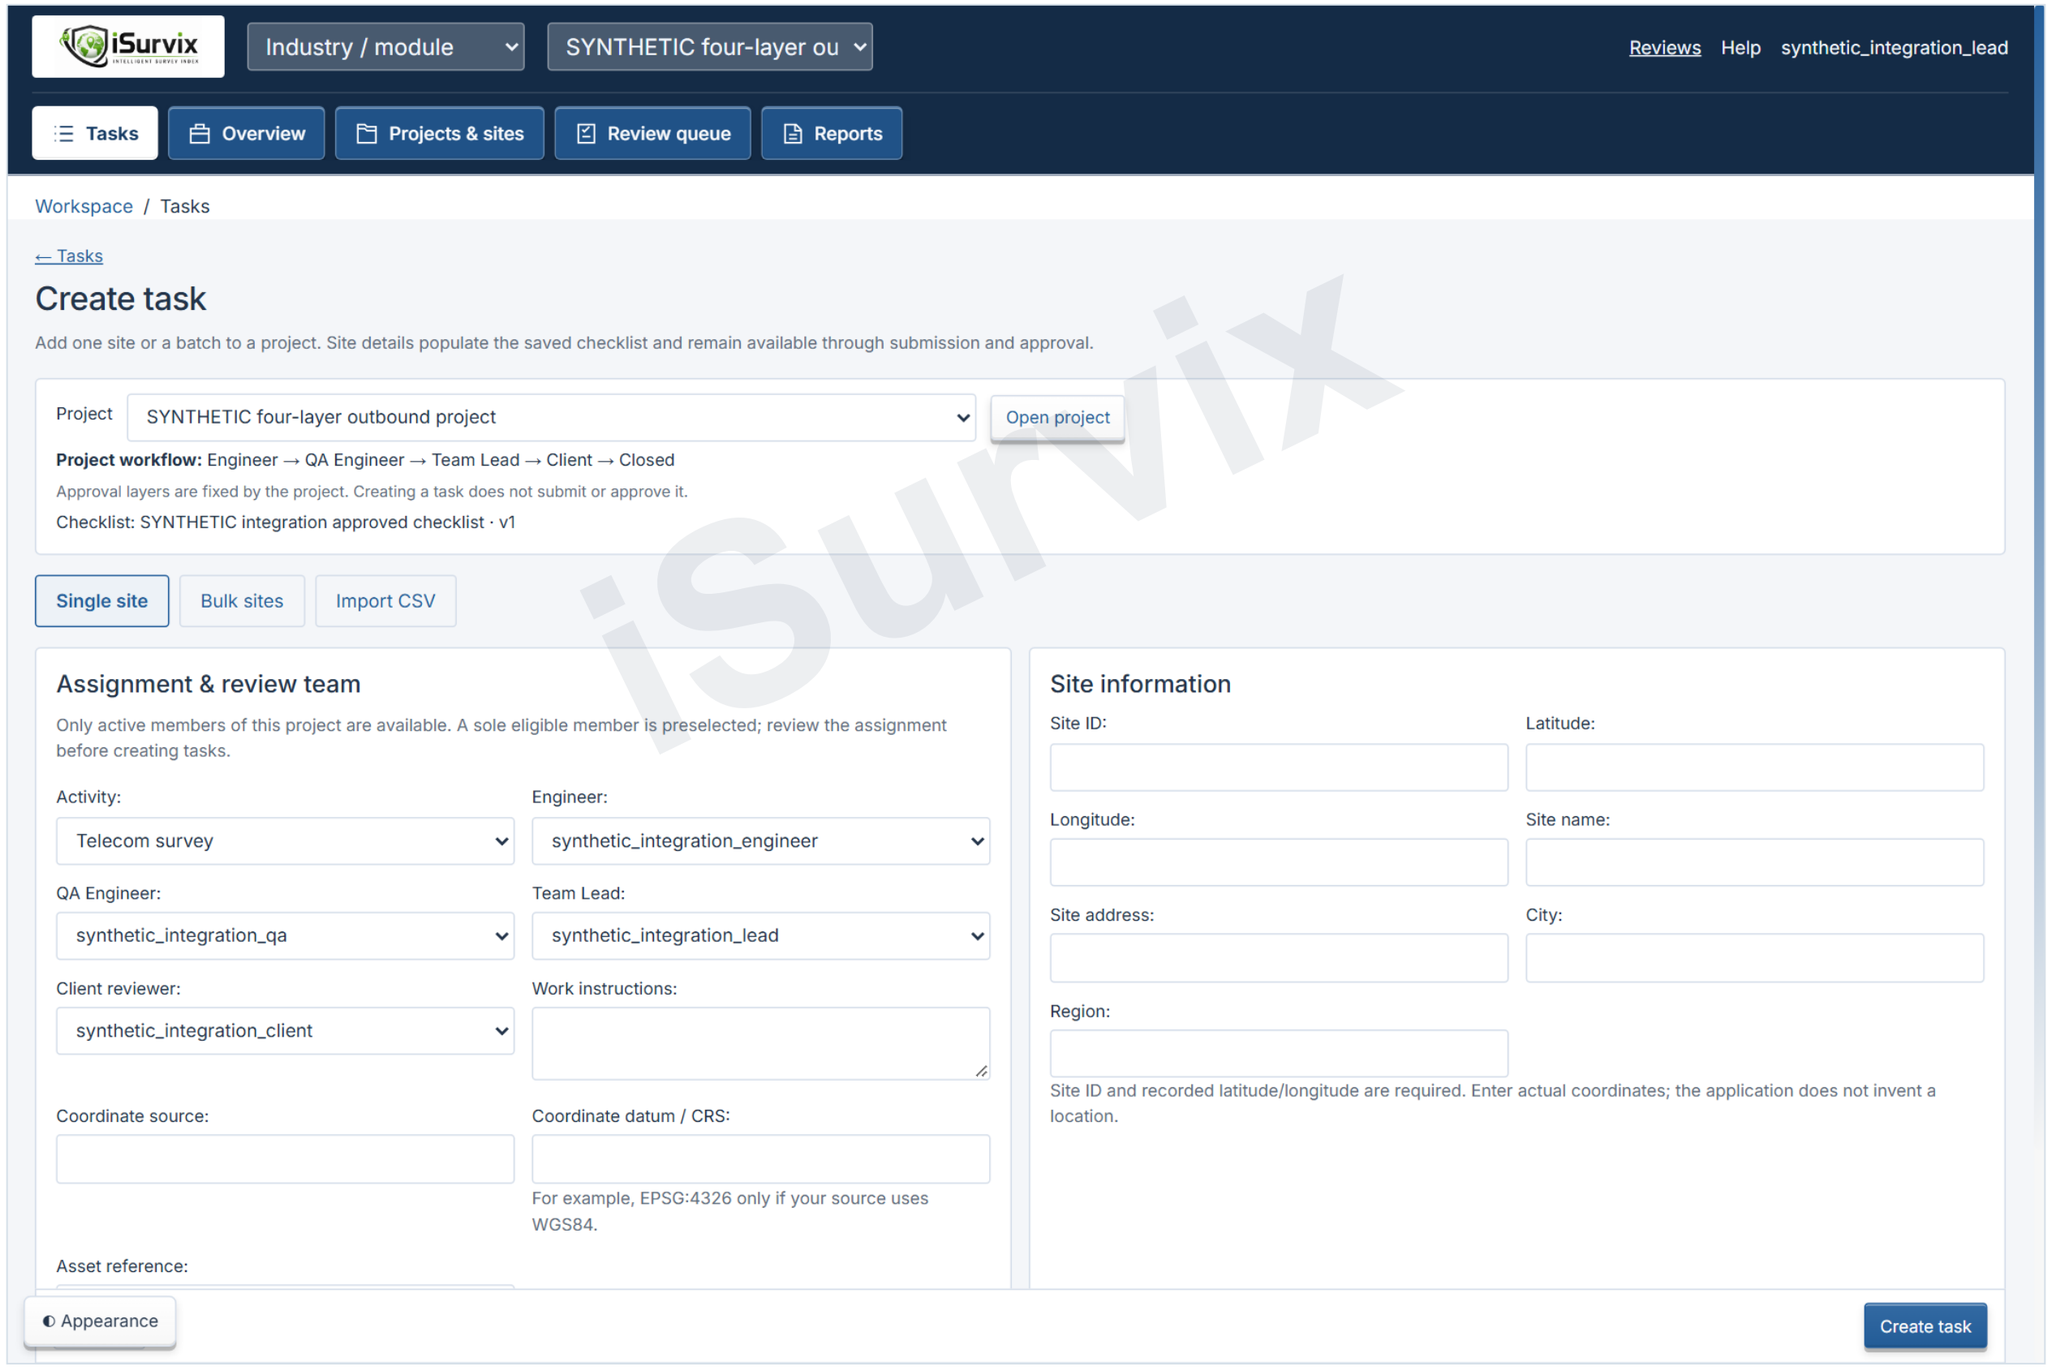

DESKTOP | 1440 x 960 viewport | Current application capture

TEAM LEAD

Team Lead site-task creation

Create a site task using the same project checklist and predefined review route.

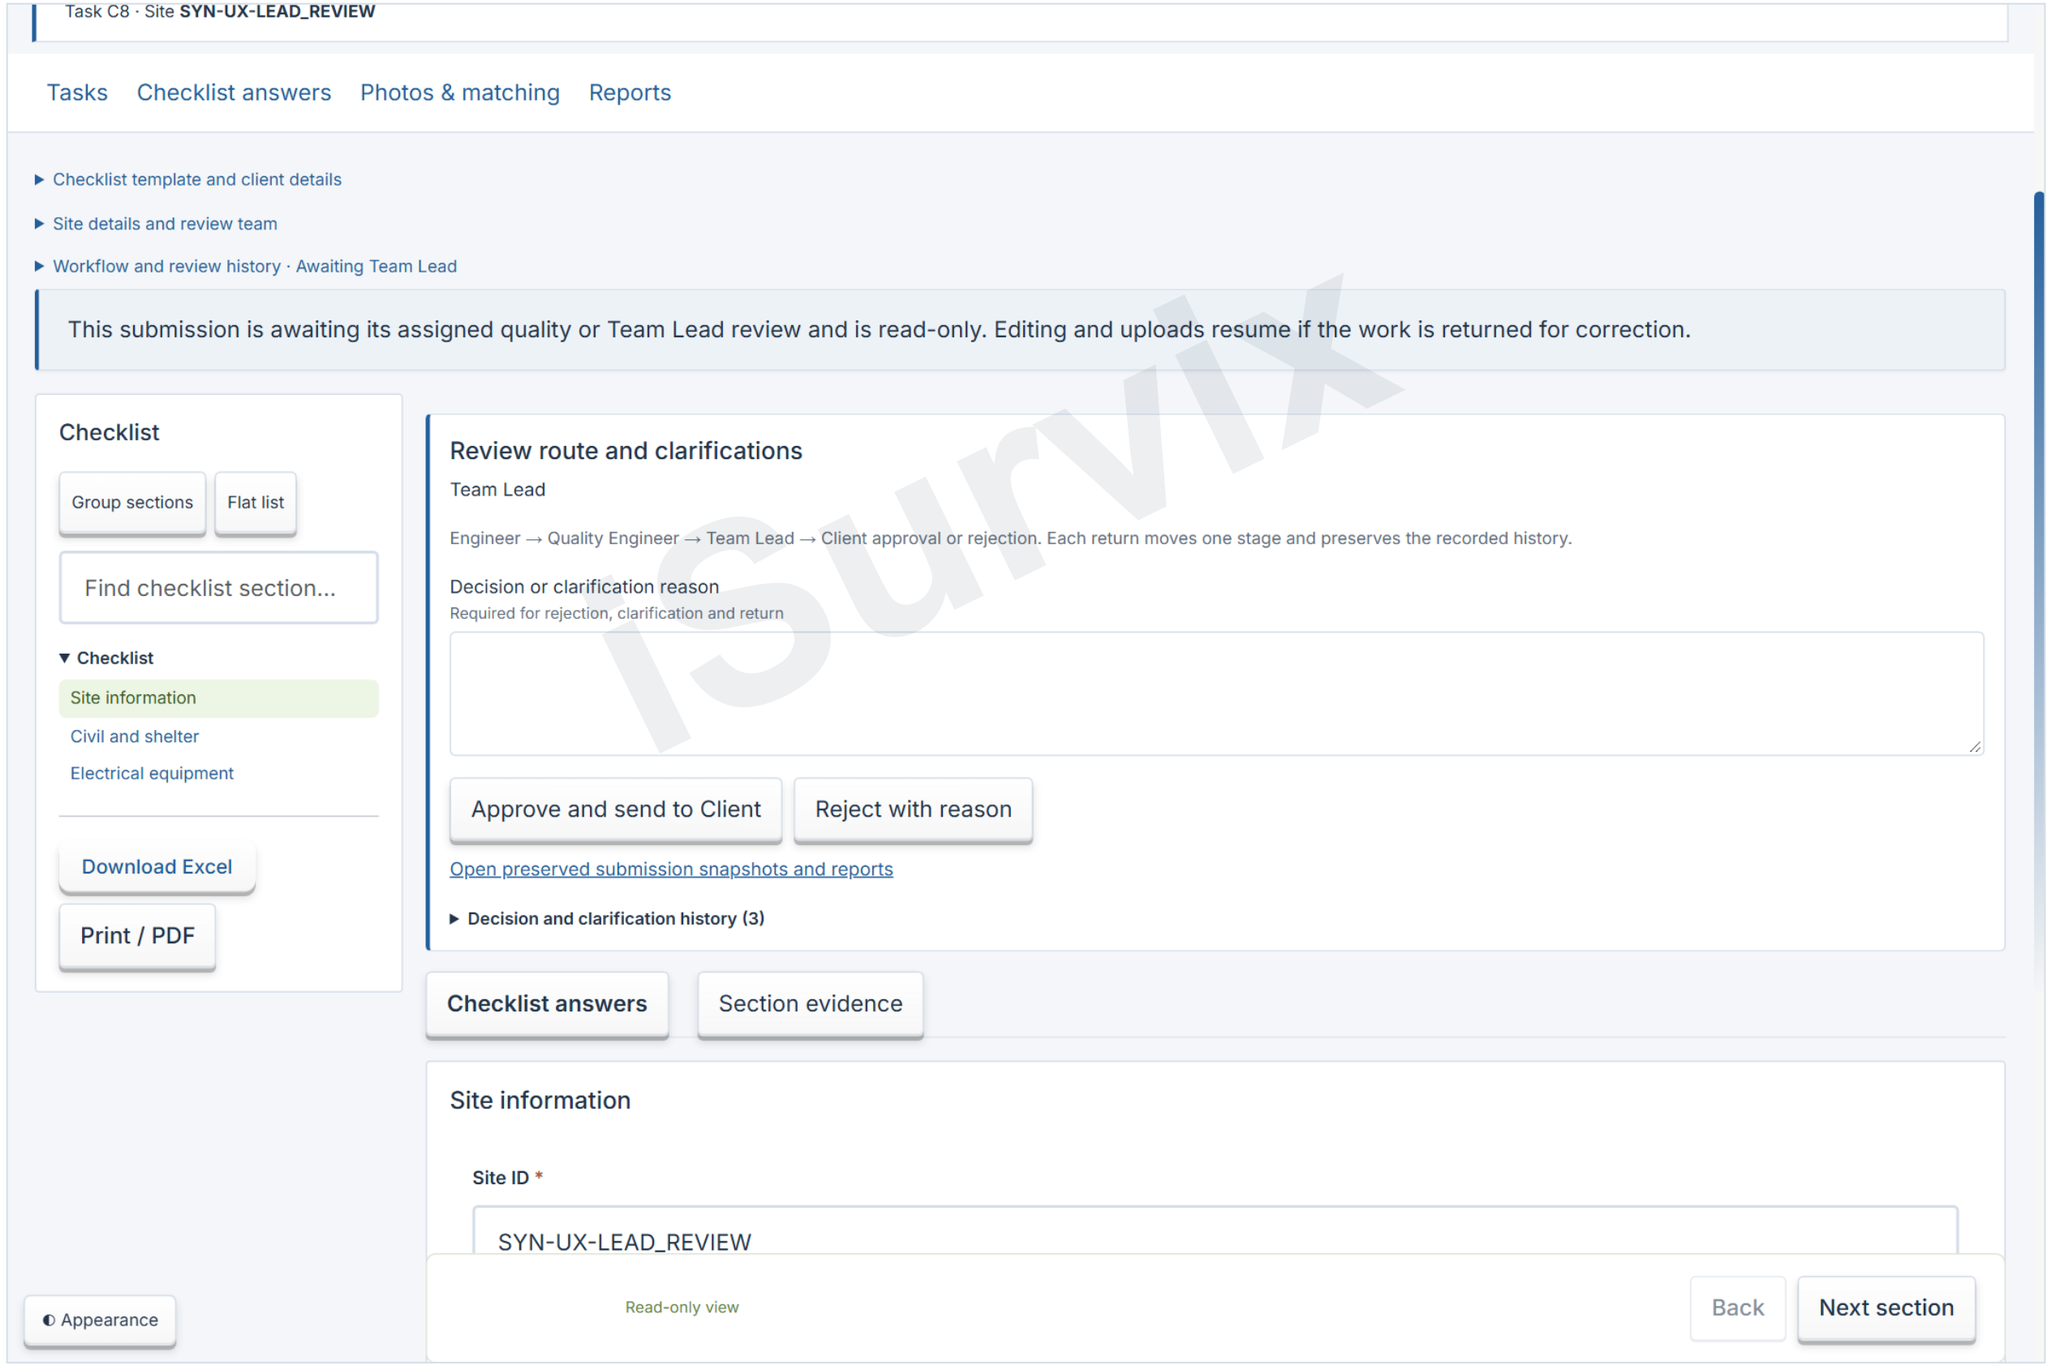

DESKTOP | 1440 x 960 viewport | Current application capture

TEAM LEAD

Team Lead approval

Review QA-approved work and its evidence before the next required hand-off.

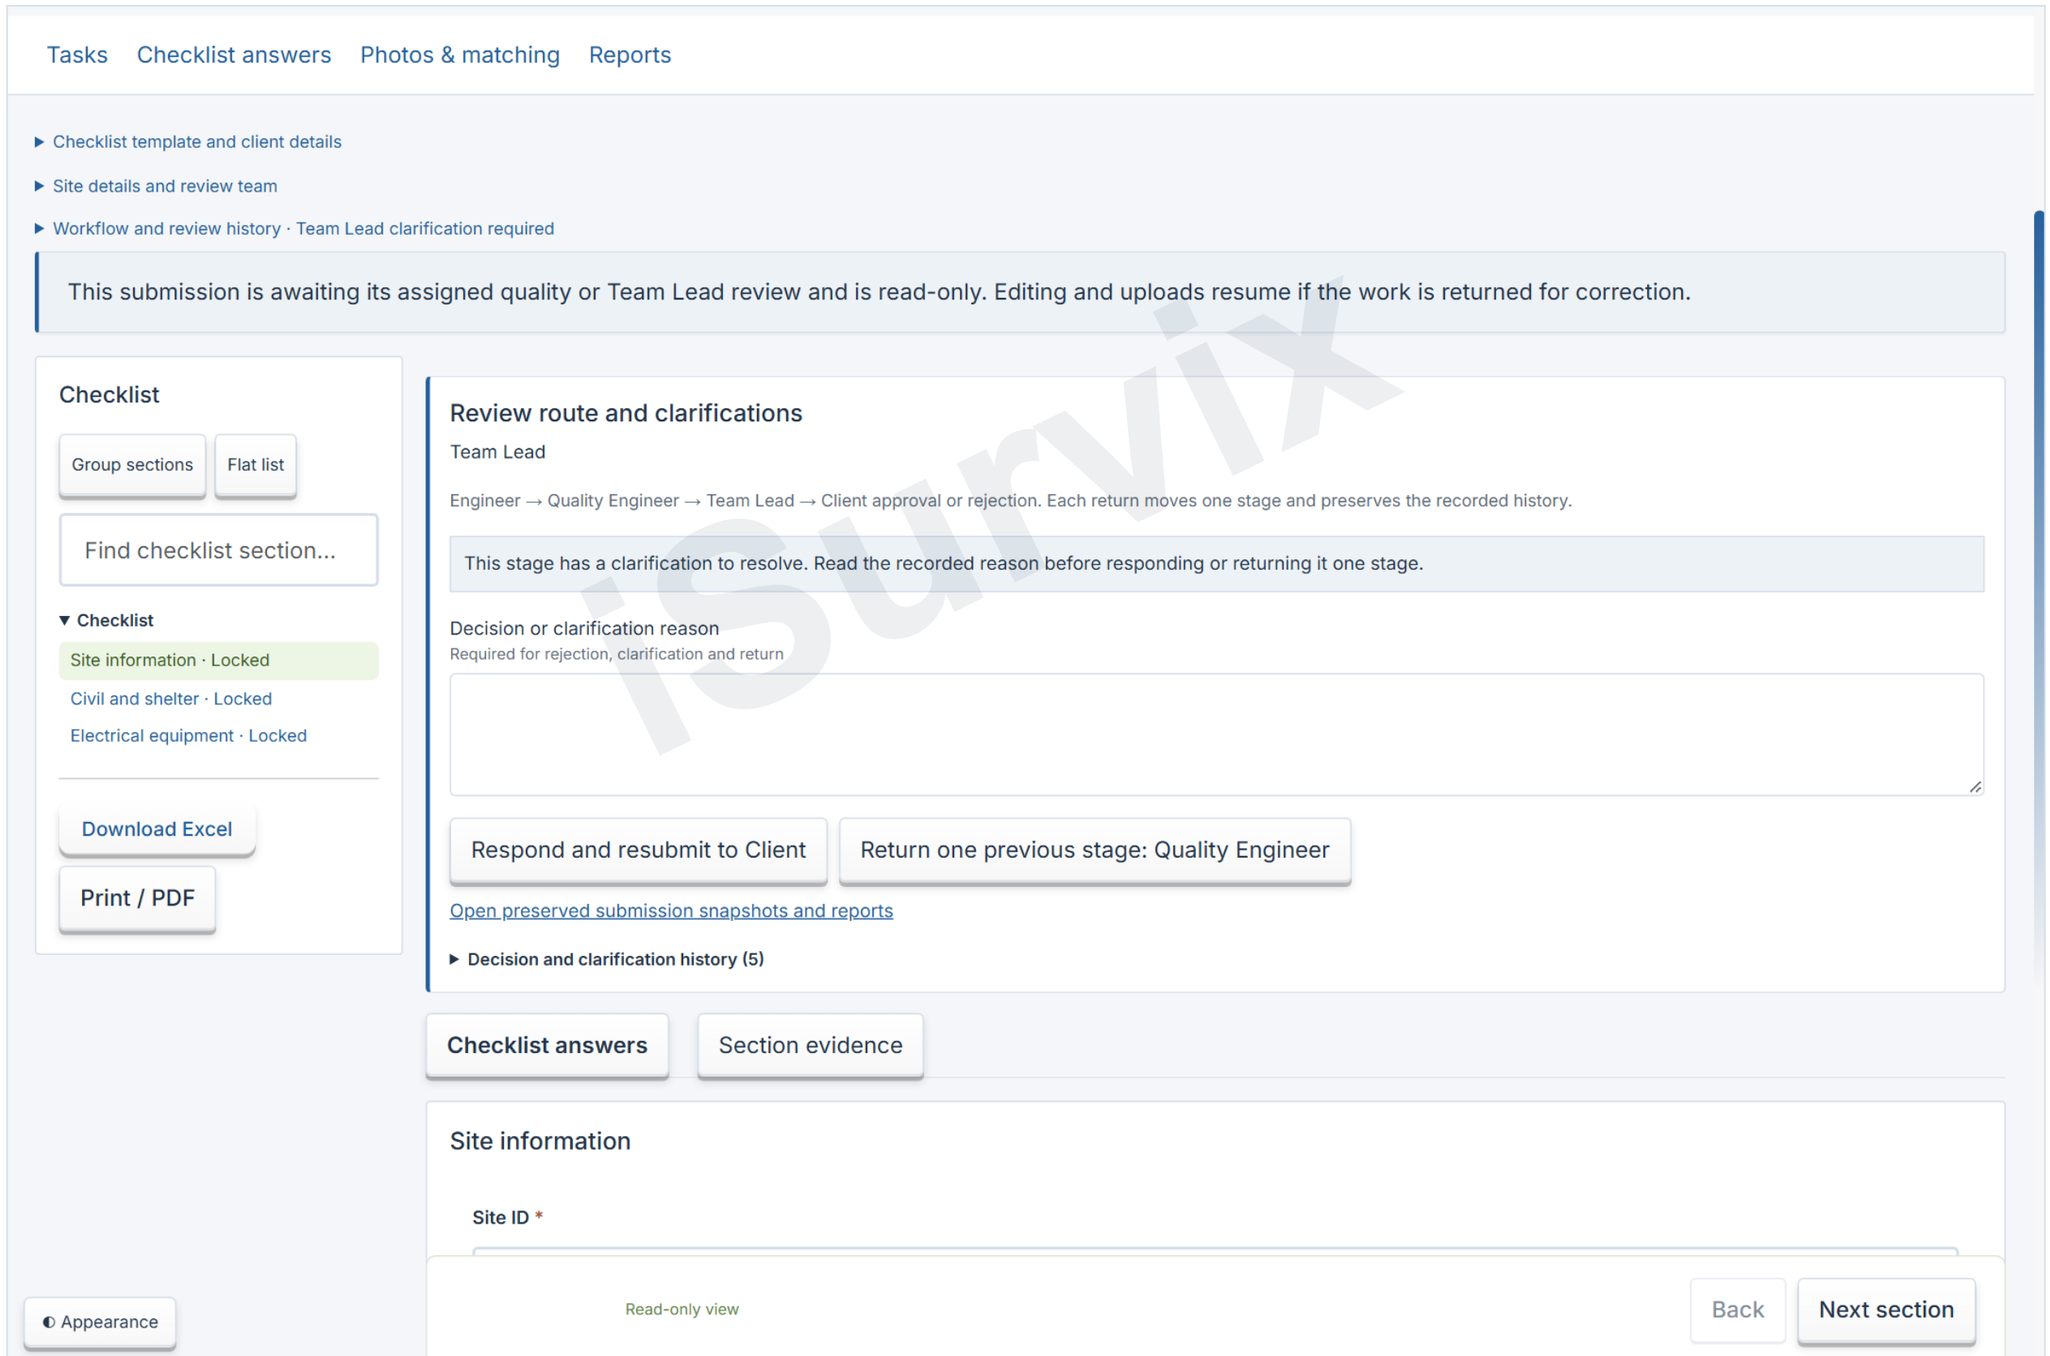

DESKTOP | 1440 x 960 viewport | Current application capture

TEAM LEAD

Client return: clarification

A Client rejection returns to Team Lead. Clarify or return one more step when source correction is needed.

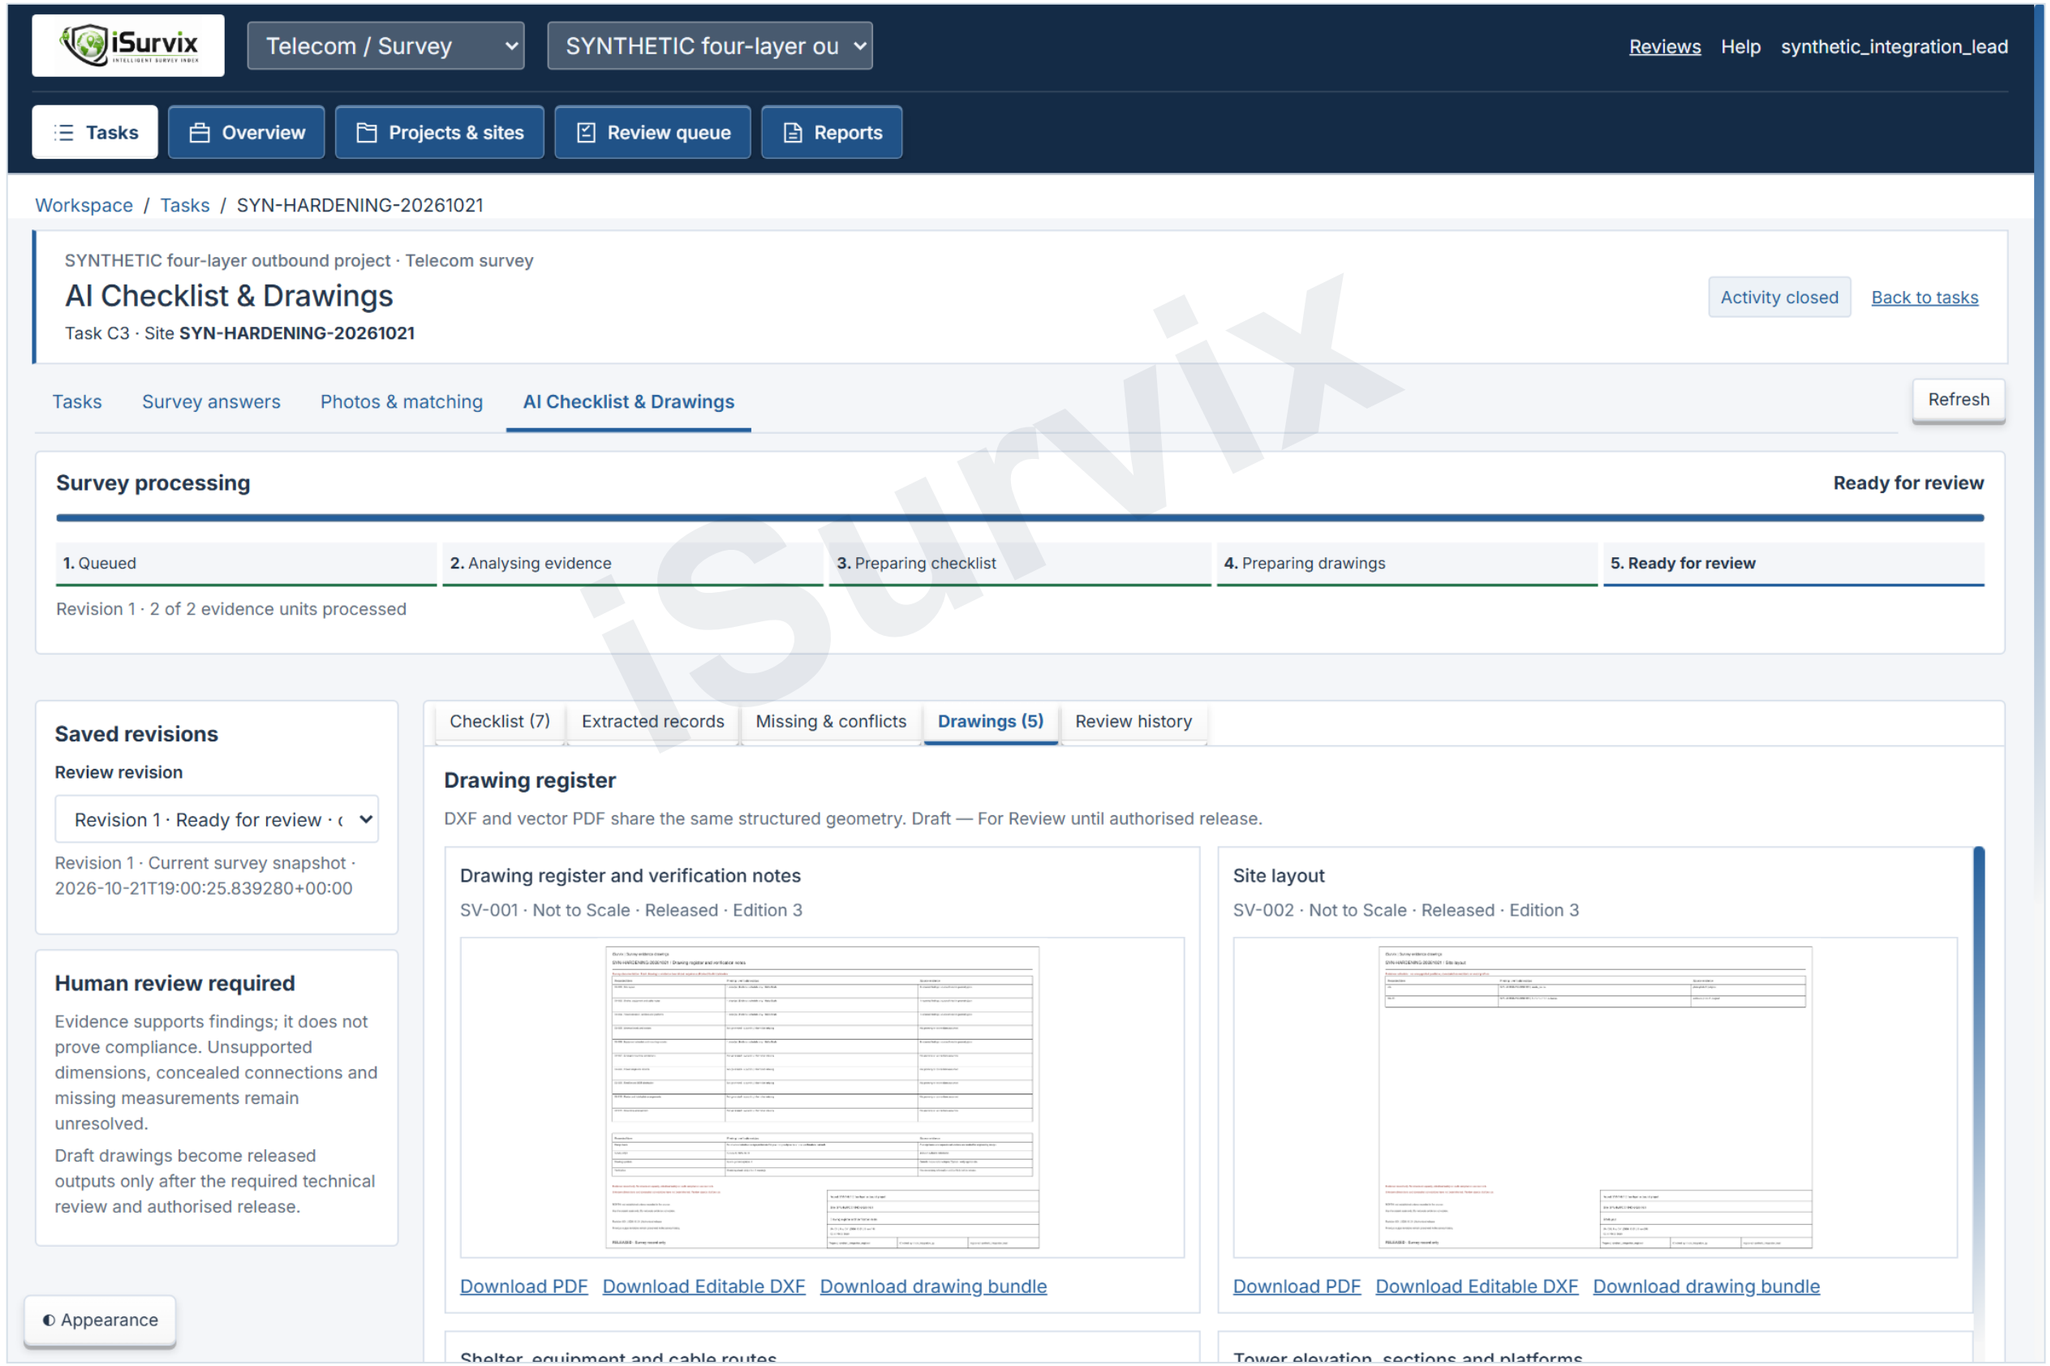

DESKTOP | 1440 x 960 viewport | Current application capture

TEAM LEAD

Authorised output and history

The Team Lead releases outputs only after required technical review and the project route closes.

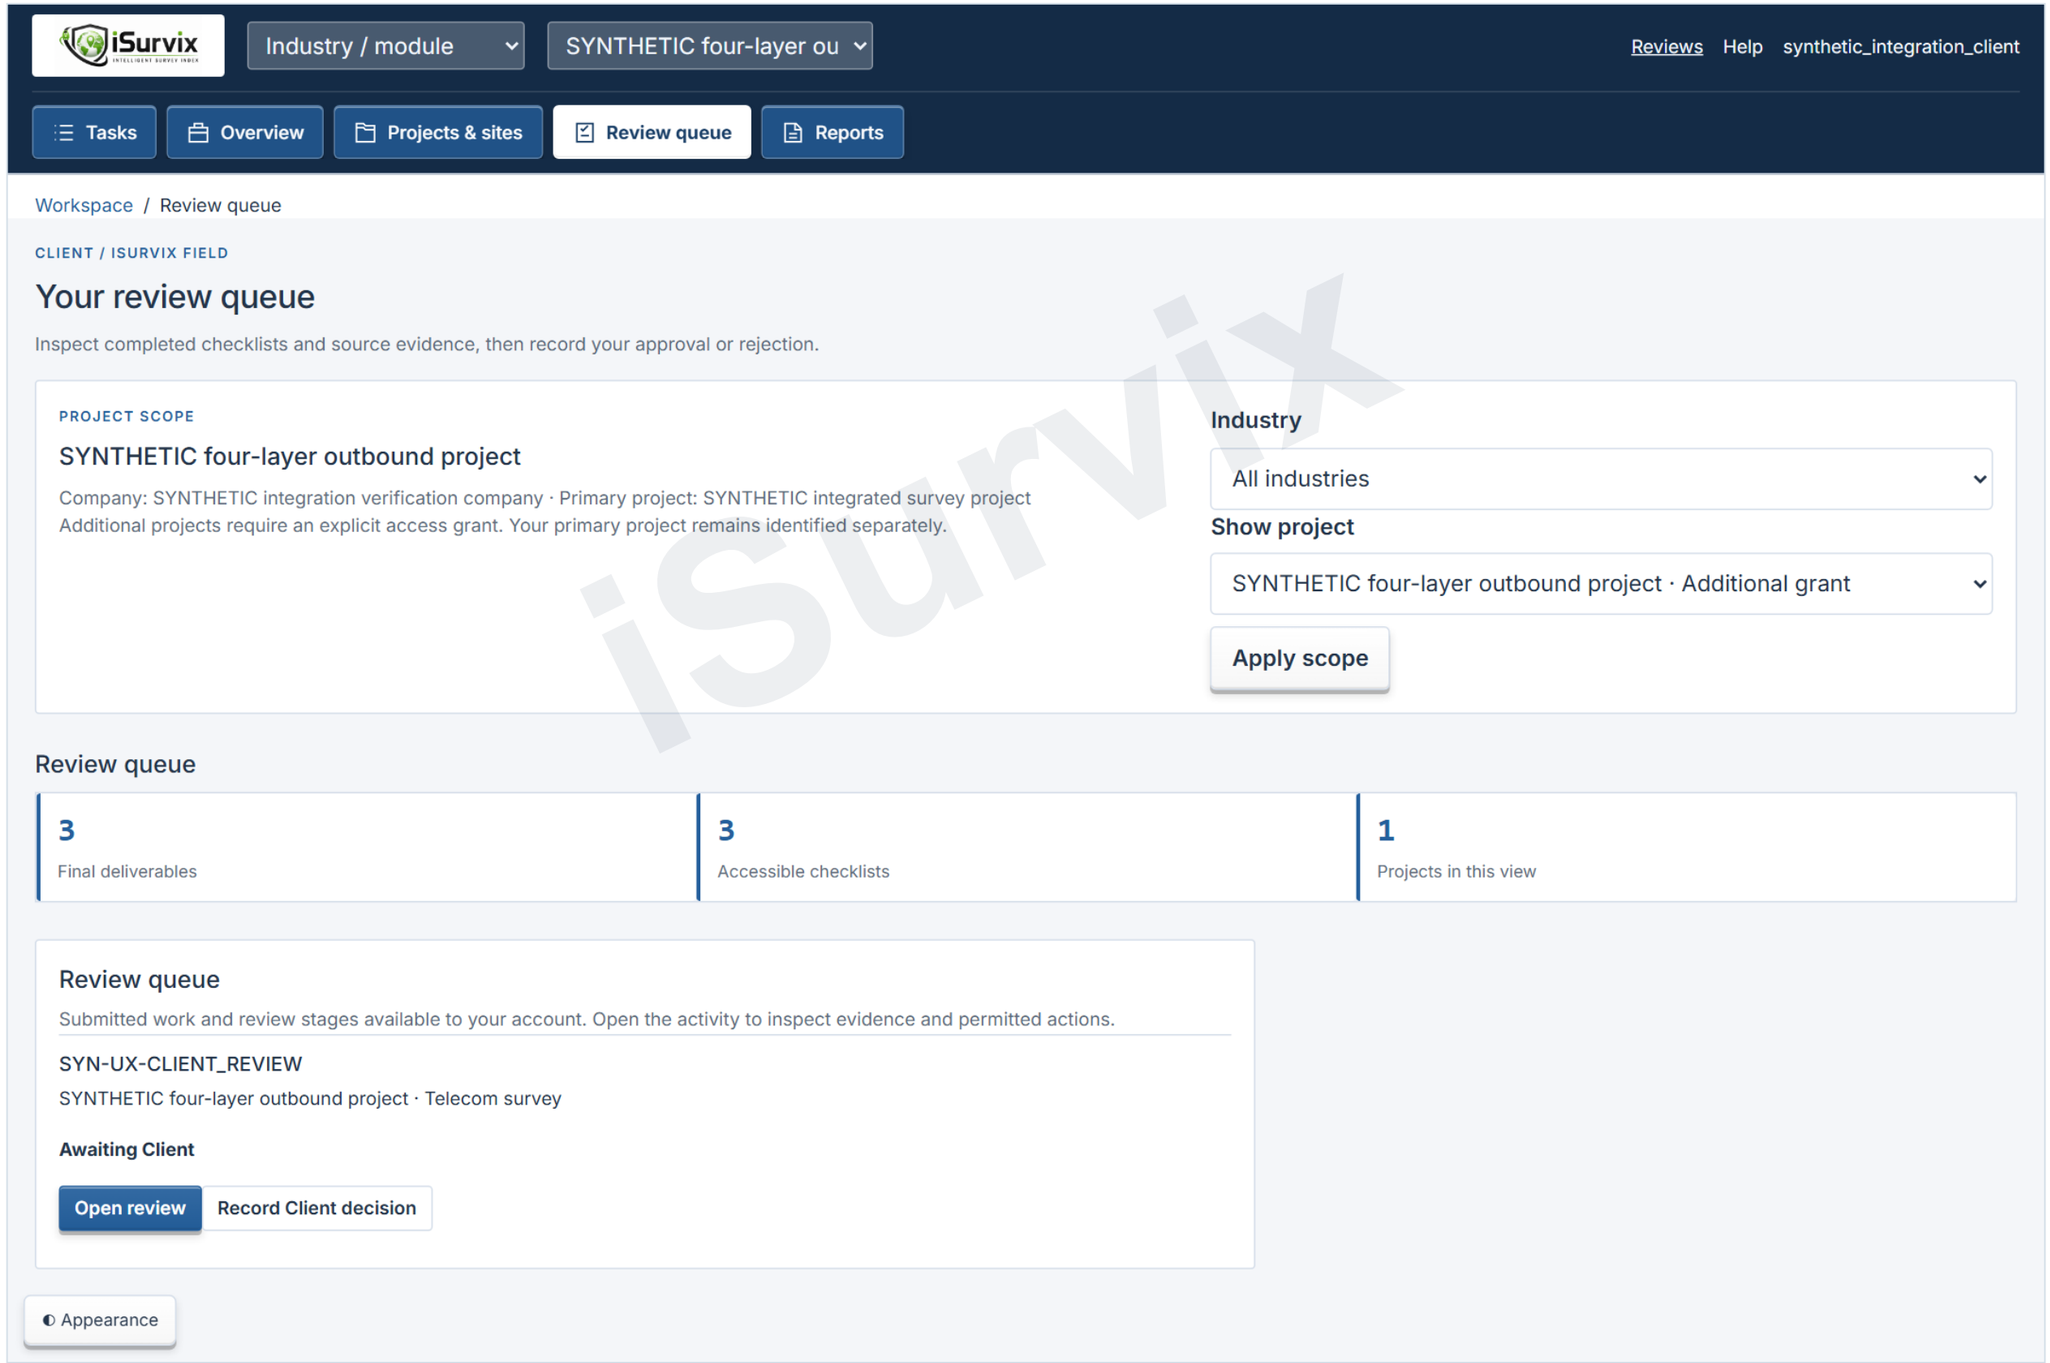

DESKTOP | 1440 x 960 viewport | Current application capture

CLIENT

Client review queue

Only work shared through the assigned project review route is available.

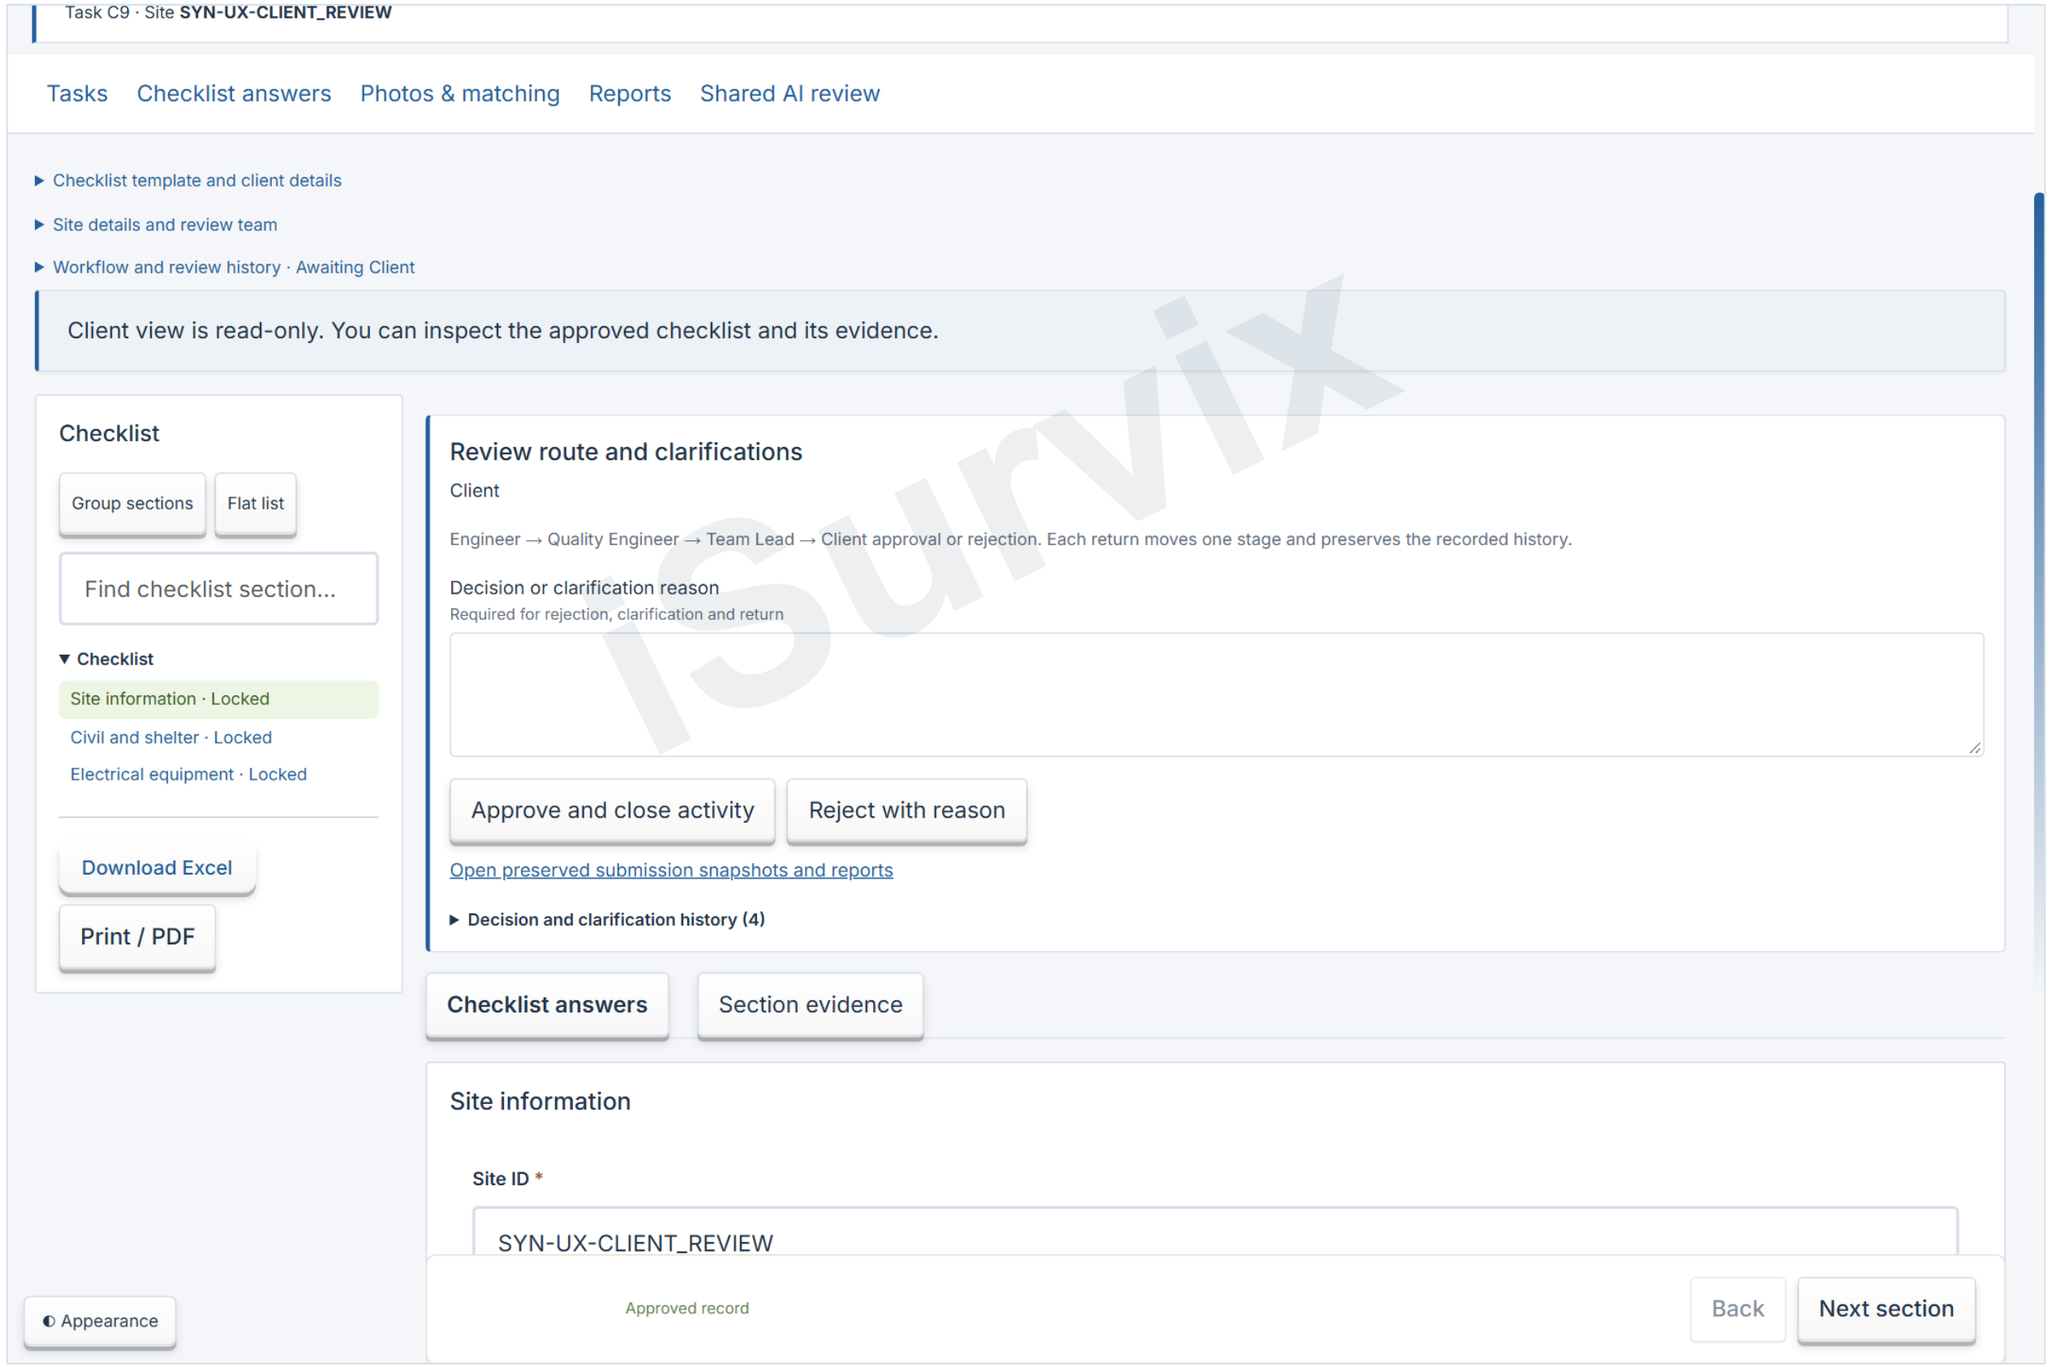

DESKTOP | 1440 x 960 viewport | Current application capture

CLIENT

Client approval or rejection

Review the submitted package and approve or reject with a reason. Rejection returns one step to Team Lead.

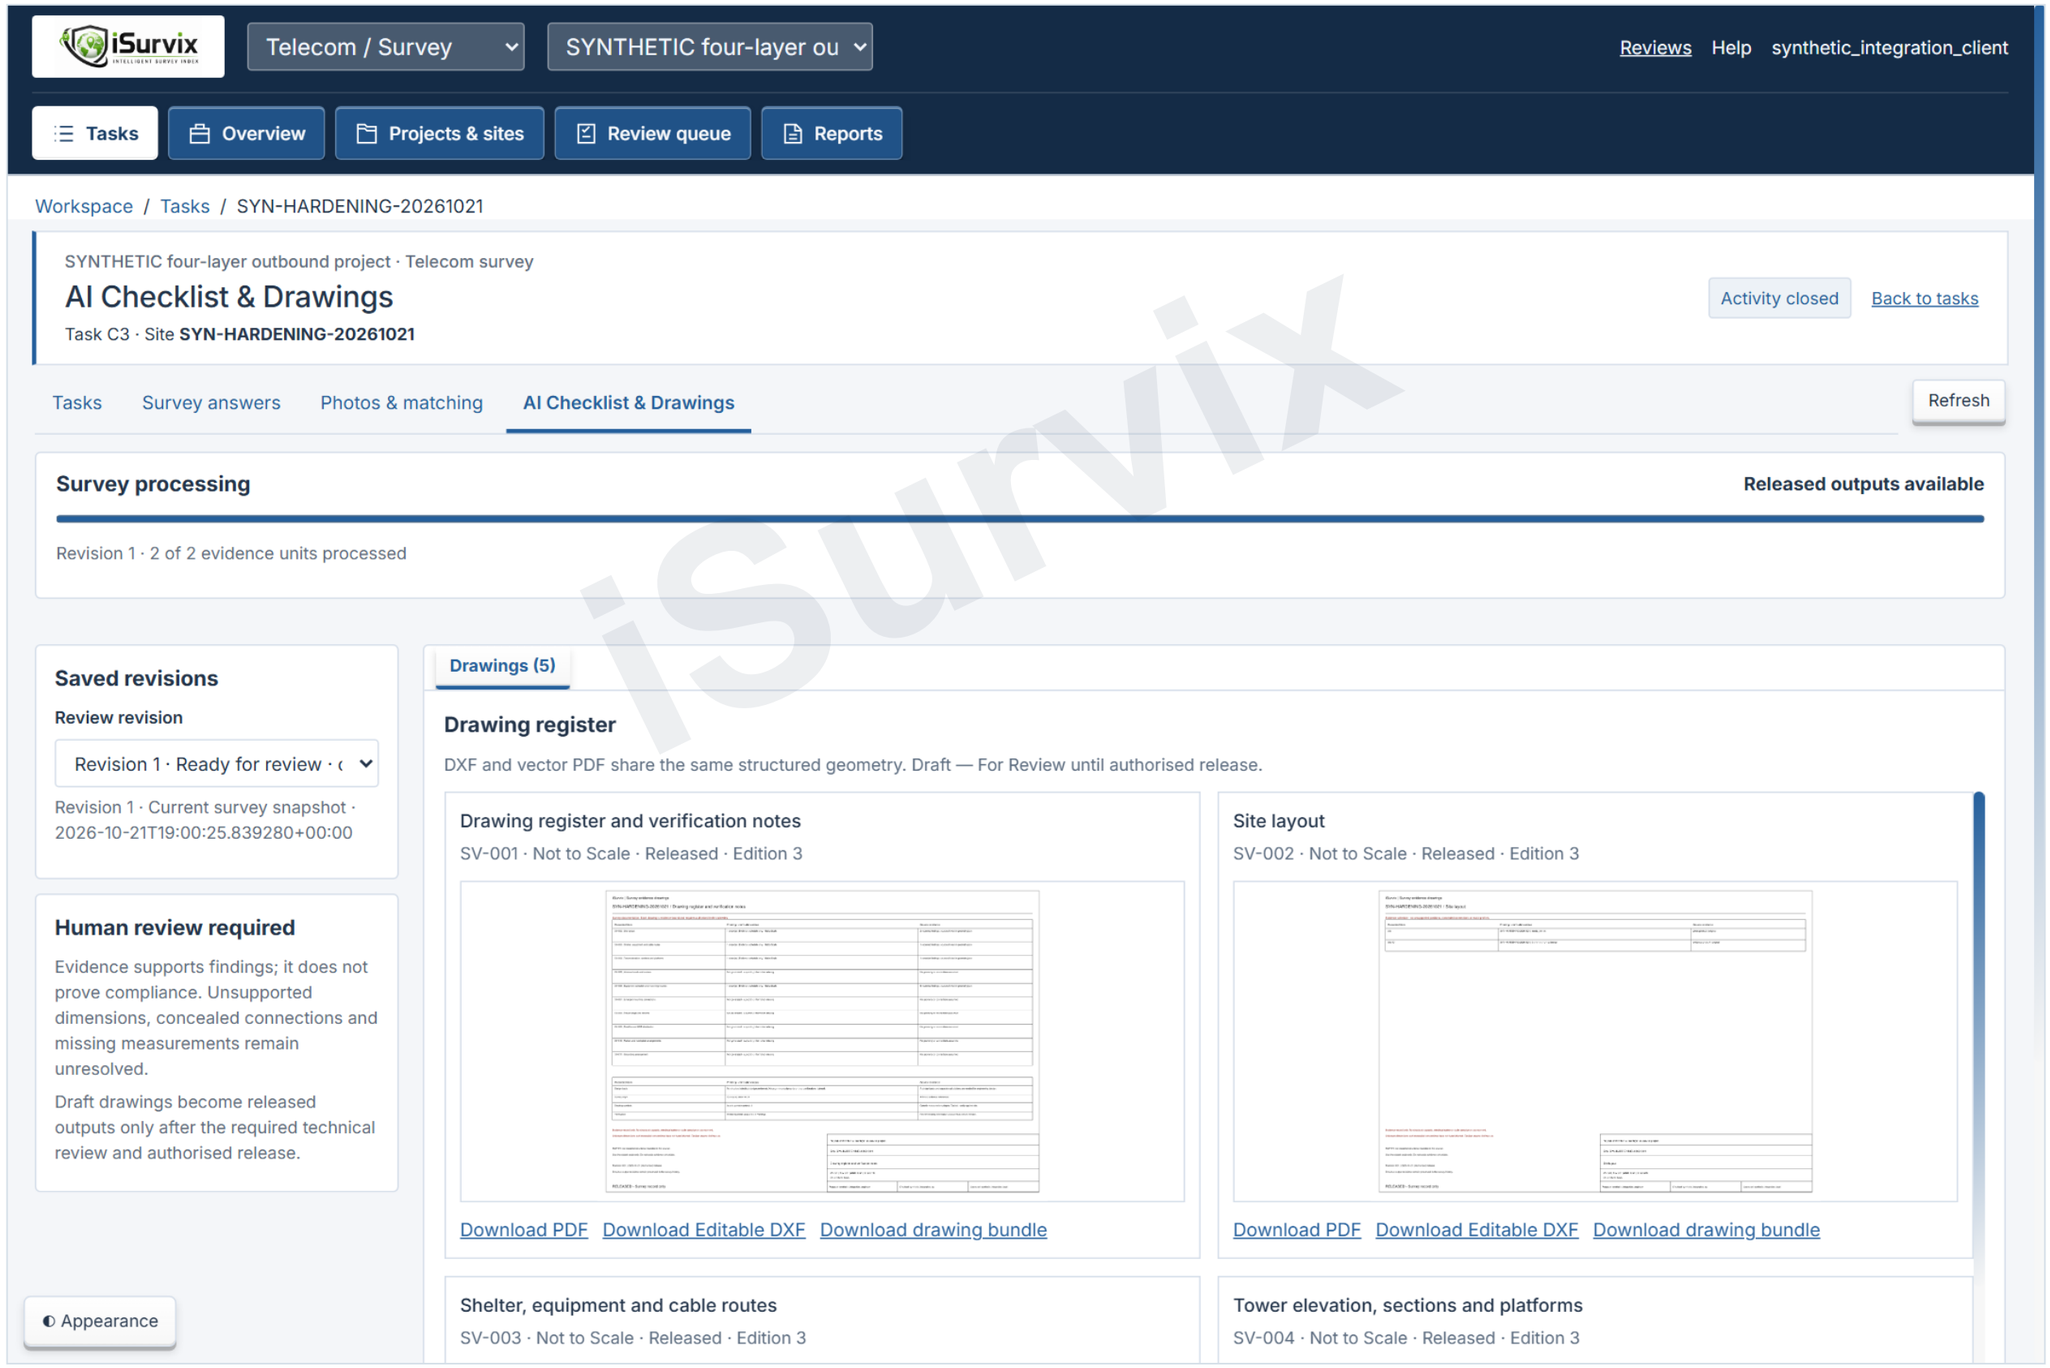

DESKTOP | 1440 x 960 viewport | Current application capture

CLIENT

Released drawings and downloads

Access permitted released PDF/DXF outputs. Internal AI proposals and comments remain private.

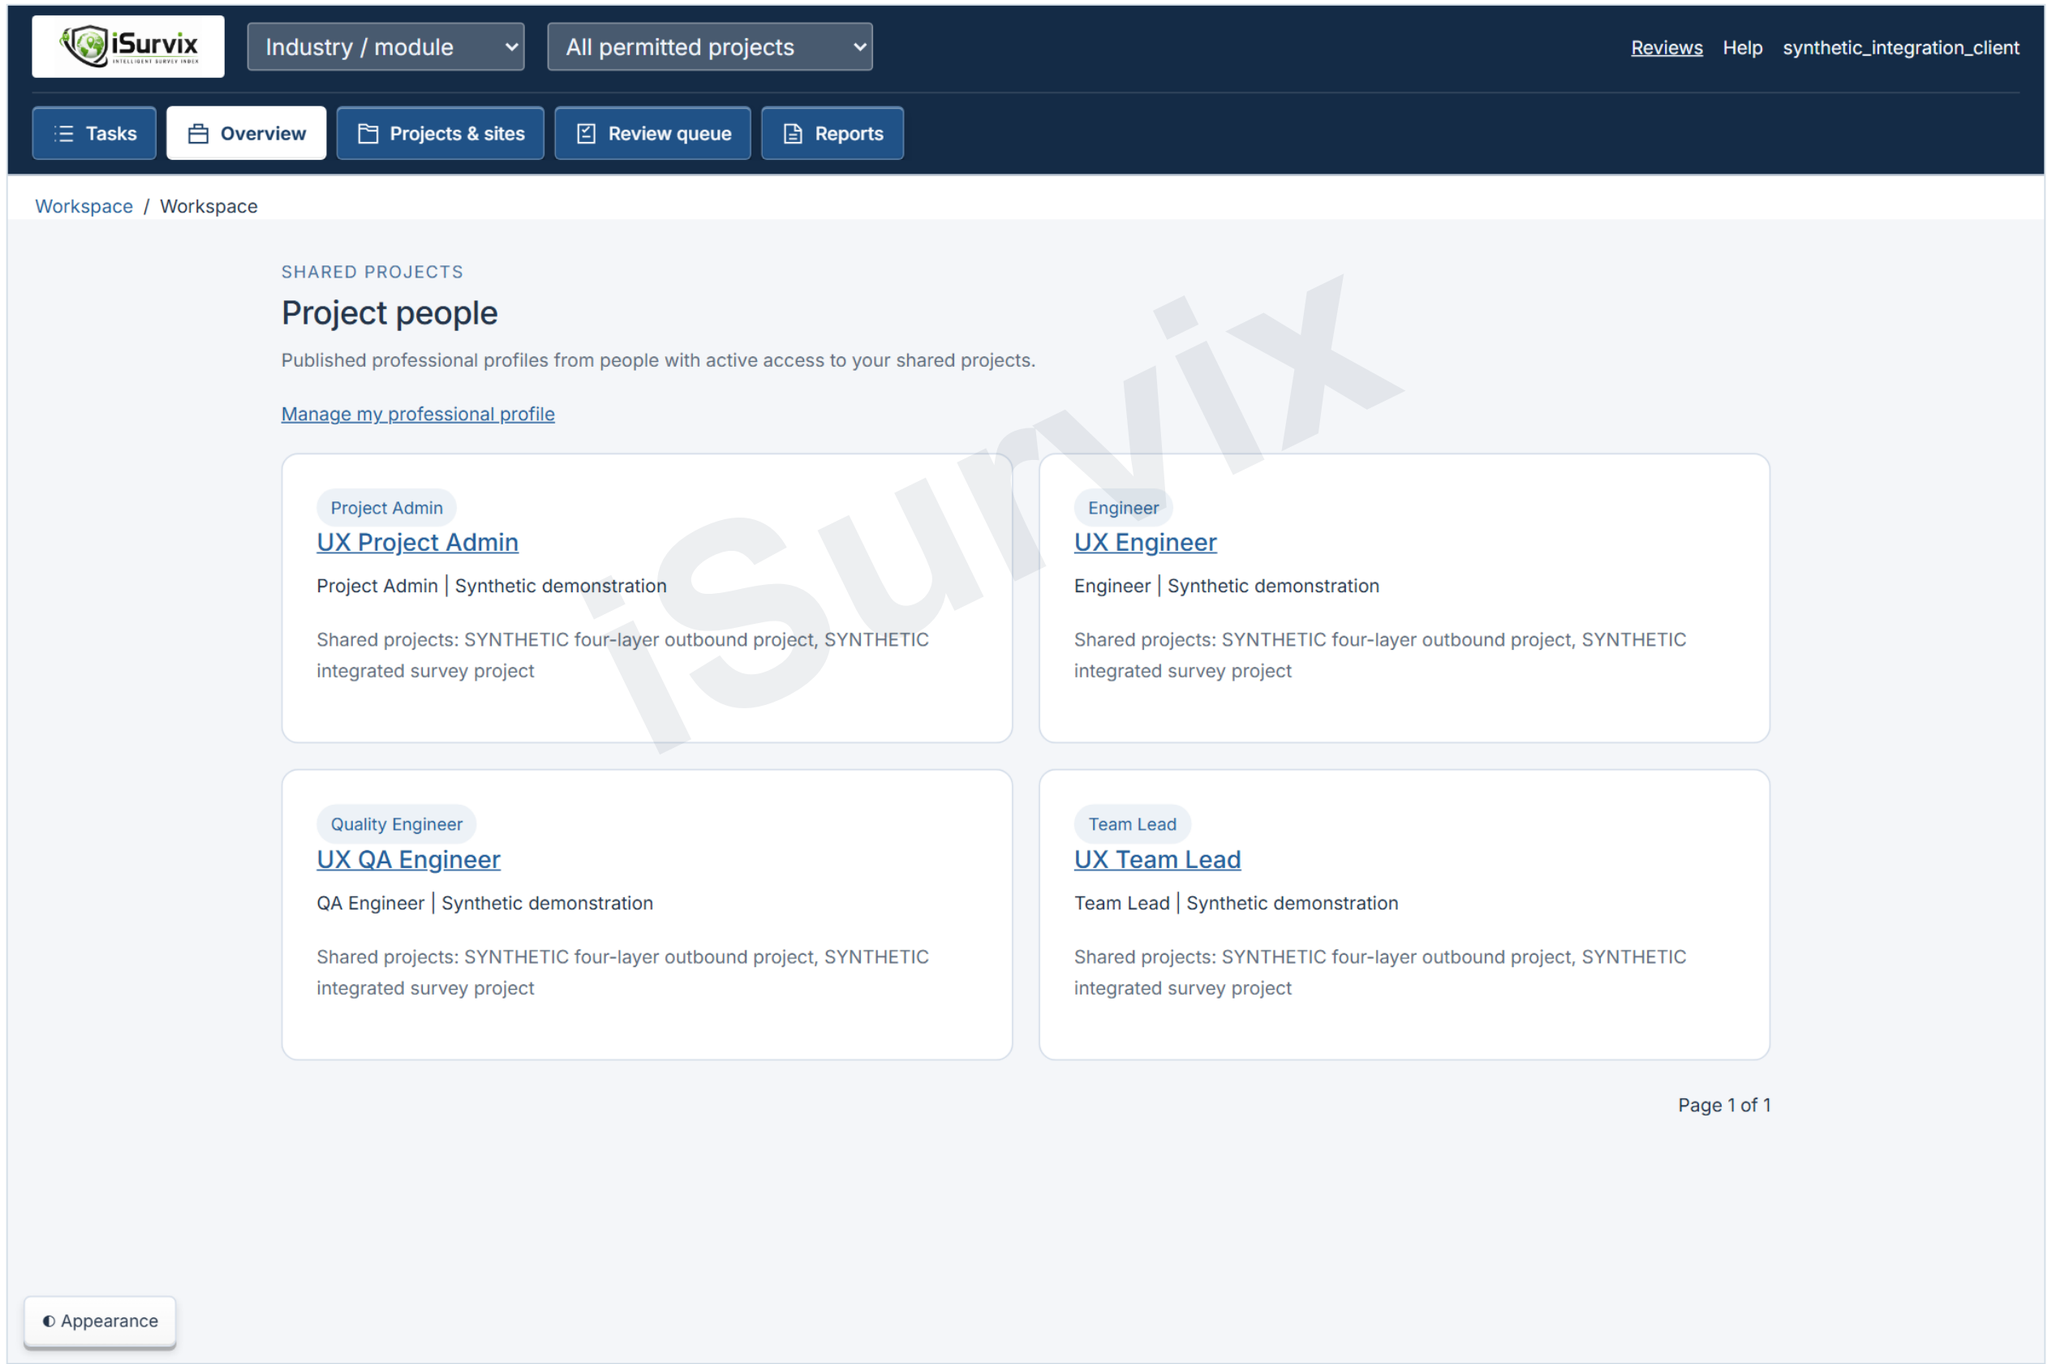

DESKTOP | 1440 x 960 viewport | Current application capture

CLIENT

Shared professional profiles

Find published work profiles belonging to eligible shared-project colleagues.

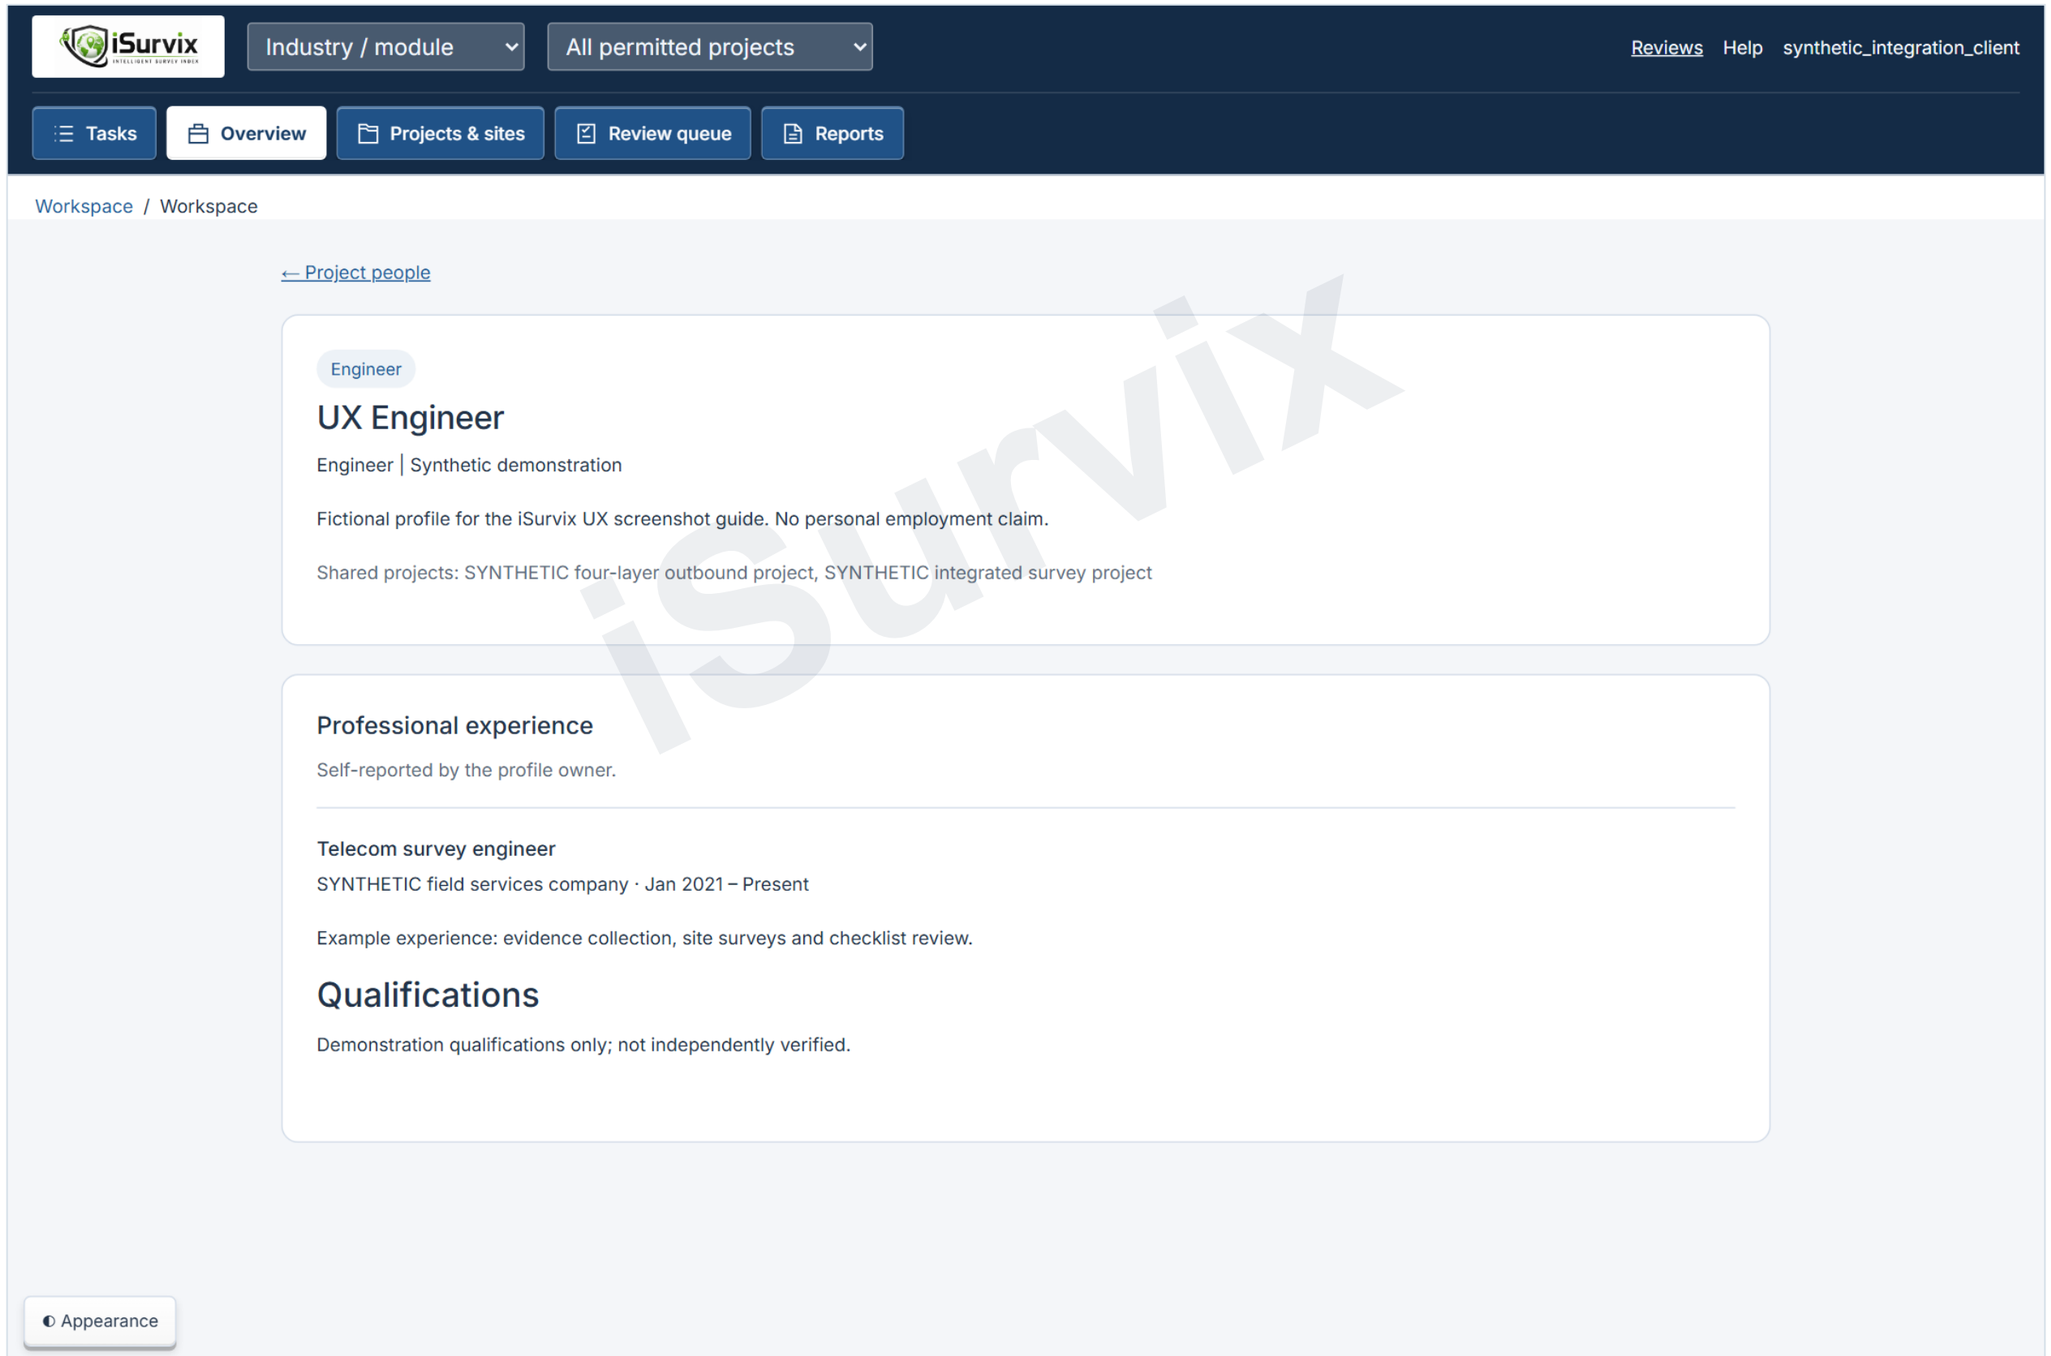

DESKTOP | 1440 x 960 viewport | Current application capture

CLIENT

View an Engineer work profile

Published experience is available to eligible clients; it is not an independent qualification check.
